

# Hall's Corner

## Economic Development & Transportation Study

Prepared for the Town of Duxbury

Prepared by:  
Old Colony Planning Council  
70 School Street  
Brockton, MA 02301

October 2014

## ***Notices***

The preparation of this report has been financed through the Massachusetts District Local Technical Assistance (DLTA) program. The views and opinions of the Old Colony Planning Council expressed herein do not necessarily state or reflect those of the Massachusetts Executive Office of Housing and Economic Development.

This District Local Assistance Study was prepared by the following members of the Old Colony Planning Council staff under the direction of Pat Ciaramella, Executive Director.

Project Manager

Eric Arbeene, Community Planner  
[earbeene@ocpcrpa.org](mailto:earbeene@ocpcrpa.org)

Supporting Staff

Jed Cornock, Senior Transportation Planner  
[jcornock@ocpcrpa.org](mailto:jcornock@ocpcrpa.org)

William McNulty, Senior Transportation Planner  
[wmcnulty@ocpcrpa.org](mailto:wmcnulty@ocpcrpa.org)

## ***Acknowledgements***

Old Colony Planning Council would like to thank all of the people who contributed to the completion of this Study.

Old Colony Planning Council worked collaboratively with the Town of Duxbury Board of Selectmen, Town Manager, Planning Department and Economic Advisory Committee to complete this analysis. We thank the Economic Advisory Committee and Planning Board and Planning Department Staff who were instrumental in providing information and guidance.

## 1.0 EXECUTIVE SUMMARY

Recognizing the importance of Hall's Corner in the community's economy and wanting to serve the needs and wants of Duxbury's residents as well as the business owners in Hall's Corner, the Duxbury Economic Advisory Committee (EAC) and Town Manager René J. Read on behalf of the Town of Duxbury requested that the Old Colony Planning Council (OCPC) conduct a study analyzing the market conditions, traffic patterns and parking turnover in Hall's Corner.

Considering the interrelationship between economic development and transportation and how they collectively contribute to the success of a business district, it was important both elements be considered together throughout the study process. Thus, this Economic Development and Transportation Study has collectively integrated both economic development and transportation considerations in the identification of recommended strategies to support and strengthen Hall's Corner now and in the coming years. Study recommendations for both the economic development and transportation components of the study are categorized into short-term recommendations and long-term recommendations.

### **Economic Development Recommendations**

#### Short-Term

##### *Marketing & Promotion*

Marketing and promotion of the area is recommended to help raise the local and regional exposure of Hall's Corner and should focus on the area's strengths, such as the caliber of local/independent stores and personalized service. According to the market analysis, the local market area has plenty of untapped market potential. Strategies recommended to further increase the marketing and promotion of the area include:

- Encouraging Business Owners to Expand Store Hours
- Creating Additional Special Events to Draw Customers to Hall's Corner (Similar to Holly Days)
- Establishing a Web Presence (via a website and Facebook page)
- Development of a Merchant Guide/Brochure
- Encouraging Businesses in Hall's Corner to Engage in Cooperative Advertising

##### *Business Development & Recruitment*

The successful development and recruitment of business within Hall's Corner is needed to develop critical mass and increase economic activity in the area. Results of surveys, interviews, and the market analysis suggest that the following types of businesses would be the most viable, compatible, and appropriate for Hall's Corner:

- Upscale Full-Service Restaurant(s)
- Hardware/Garden Store
- High-End Clothing/Accessory Store(s)
- Limited-Service Restaurant(s)

For this to succeed the community should strongly consider developing attractive recruitment and marketing materials to present to interested prospects. The recruitment materials should be designed to show interested prospects why they should consider locating to Hall's Corner. Material contents should include: a list of businesses currently located in Hall's Corner, the types of businesses that the town would like to attract, a listing of available commercial properties, a variety of trade area demographic characteristics, traffic counts of local roadways and contact information for town officials.

## Long-Term

### *Market Identification/Branding*

Duxbury should consider developing a unique identification or a brand for Hall's Corner as a way to stand out among competing business districts and shopping centers. It should project a positive attitude and approach and be seen as a place where people would want to spend time. Market identification or branding can have a number of positive impacts including increasing exposure for existing businesses, as well as used as a recruitment tool for prospective businesses.

### *Appearance Improvement*

A lack of cohesion in Hall's Corner between Foodie's Plaza, the Marketplace, and the Traffic Circle was cited as one of the key impediments in Hall's Corner. Improving the appearance of Hall's Corner is crucial in building that sought after cohesiveness and is a way to attract new business and stimulate economic development. Strategies recommended to enhance the appearance of the area include:

- Incorporation of Streetscape Elements (period/historic light fixtures, trees and plants, sidewalks, and street furniture, such as benches, trash receptacles, bicycle racks, bollards)
- Updating Wayfinding/Directional Signage
- Undergrounding of Utility Wires
- Development of a Façade Improvement Program

### *Preserve Ground Floor Space for Retail Uses*

Realizing there is limited opportunity for the expansion of retail space in Hall's Corner due to the surrounding land uses, it is recommended that the Town examine the possibility of preserving ground floor space in Hall's Corner for retail uses only. Preserving ground floor space for retail uses only will generate additional foot traffic, benefitting all businesses in Hall's Corner.

### *Expand Sewage Capacity*

While the use/reliance of private wastewater treatment systems is currently an acceptable form of sewage treatment for Hall's Corner, the town should investigate the feasibility of constructing a larger package wastewater treatment plant that could process thousands of gallons of sewerage daily. The size of the system would be dependent on the number of businesses utilizing the system and their particular uses.

## **Transportation and Safety Recommendations**

### Short-Term

#### *Traffic Circle Parking Considerations*

Several parking spots within Hall's Corner directly interfere with the operation of the intersection and present a safety hazard to motorists. The removal of the following parking spaces should be considered:

- Removal of diagonal parking beyond the Stop Sign on Standish Street
- Removal of parallel parking between Bay Road and Standish Street; and between Standish Street and Washington Street

#### *Signage*

Roadway signage in Hall's Corner should be consistent and in compliance with the Manual on Uniform Traffic Control Devices (MUTCD). Recommended signage improvements include:

- Upgrading Stop Signs on Depot Street, Washington Street, Standish Street, and Bay Road to include retroreflective surfaces.
- Installation of Traffic Circle signage on all approaches to Hall's Corner.
- Improving the visibility of the Stop Sign on the Standish Street approach. This should include the removal of the last parking space before the Stop Sign and the construction of a curb bump out to bring the Stop Sign closer to the travel lane.
- Installation of appropriate Crosswalk signage at the mid-block crosswalk on Depot Street. Safety could be further improved at this crosswalk with the installation of pedestrian actuated Rectangular Rapid Flash Beacons.
- Installation of "Keep Right" signage on the flag pole island in the center of Hall's Corner should be updated to include an arrow pointing right.

#### *Pedestrian and Bicycle Improvements*

To maximize the attractiveness of Hall's Corner as a shopping, restaurant, and services destination, the following improvements should be made to the pedestrian and bicycle infrastructure:

- Creation of ADA compliant crosswalks at the intersection.
- Creation of a designated walkway from the Housing Authority to Foodie's Plaza to Depot Street.
- Installation of a "raised crosswalk" for the mid-block crosswalk on Depot Street.
- Painting of shared-lane markings or "sharrows" on the roadways approaching Hall's Corner to alert drivers to the presence of bicyclists.
- Placement of bicycle racks at Hall's Corner destinations.

#### *Visibility Improvements*

Visibility can be improved via the trimming and/or removal of vegetation in the following areas to allow for clear sight lines:

- Removal of tall vegetation on the center island in Hall's Corner.
- Regular maintenance of overhanging tree canopies along the roadway.
- Trimming or removal of vegetation by Dunkin Donuts.

#### *Parking*

The presence of on-street parking reduces the capacity and flow of roadways, while increasing the potential for collisions; however, parallel and angle on-street parking can be useful in specific situations with context-sensitive designs by encouraging pedestrian activity, increasing parking supply and traffic calming. The following are some parking recommendations that should be considered to make Hall's Corner safer for all users:

- Encourage land owners to clearly paint formal parking spaces in all of their lots
- Improve the Parking Enforcement Program

#### *Complete Streets Policy*

Consider adopting a Complete Streets policy for the roadways that serve Hall's Corner. Complete Streets is a planning and design concept that ensures all roadway users (pedestrians, bicyclists, motorists and transit riders of all ages and abilities) are included in the design, construction, and maintenance of roadways.

## Long-Term

### *Traffic Circle Parking Considerations*

Several parking spots within Hall's Corner directly interfere with the operation of the intersection and present a safety hazard to motorists. The removal of the following parking spaces should be considered:

- Removal of perpendicular parking in front of VERC / Dunkin Donuts on Chestnut Street
- Removal of perpendicular parking between Chestnut Street and Bay Road

### *Pedestrian and Bicycle Improvements*

To maximize the attractiveness of Hall's Corner as a shopping, restaurant, and services destination, the following improvements should be made to the pedestrian and bicycle infrastructure:

- Creation of sidewalks on both sides of each roadway

### *Traffic Calming*

Consider installing Speed Humps as another option available to calm traffic in Hall's Corner. A speed hump is much longer than a "speed bump", and is effective at reducing travel speeds while minimizing impacts on area noise, emergency vehicle operations, and snow plow operations.

### *Parking*

The presence of on-street parking reduces the capacity and flow of roadways, while increasing the potential for collisions; however, parallel and angle on-street parking can be useful in specific situations with context-sensitive designs by encouraging pedestrian activity, increasing parking supply and traffic calming. The following are some parking recommendations that should be considered to make Hall's Corner safer for all users:

- Enlargement of the parking spaces on Standish Street
- Investigate the possibility of constructing a public parking lot

### *Modern Roundabout*

Consider performing an engineering evaluation at the traffic circle to determine if a modern roundabout is feasible in Hall's Corner. Modifying the traffic circle into a roundabout would effectively process the low to moderate traffic volumes in Hall's Corner as well as increase pedestrian safety, due to the presence of splitter islands providing a pedestrian refuge.

## **2.0 INTRODUCTION AND BACKGROUND**

Duxbury is a coastal suburban community of slightly more than 15,000 residents located on the South Shore of Massachusetts, approximately 33 miles south of Boston. Duxbury is 37.63 square miles (of which 23.76 square miles are land) and is bordered by Duxbury Bay to the east, Kingston Bay and Plymouth to the southeast, Kingston to the southwest, Pembroke to the north and northwest and Marshfield to the north.

Duxbury's coastal location has played a prominent role throughout its history. Settled in 1624 and incorporated in 1637 by original Mayflower passengers Myles Standish and John Alden, Duxbury served primarily as a farming and fishing community throughout the seventeenth and eighteenth centuries and experienced little growth. Duxbury was on the map for the first time in the late eighteenth and early nineteenth centuries as a shipbuilding center. By the mid-1840s there were more than 20 shipyards in Duxbury, making it the largest producer of sailing vessels on the South Shore. Its status as a shipbuilding center was short lived however, as faster, newer Clipper ships were too large for Duxbury Bay.

By the 1870s Duxbury began to be seen as a summer retreat for city dwellers and a number of hotels, cottages and related businesses sprang up along its shoreline to cater to the summer visitors. Duxbury remained a small summer resort community until the construction of Route 3 in the 1950s and 1960s. The introduction of Route 3 made Duxbury much more accessible to Boston and other employment centers and as a result Duxbury's population grew fourfold from 3,167 in 1950 to 13,895 in 1990.

Throughout the years town officials and residents alike have wanted to maintain Duxbury's suburban residential character by limiting the amount of commercial and industrial zoned land in town. Today, Duxbury remains a largely residential community with approximately 80 acres of commercially zoned land, with the largest area being Hall's Corner.

Recognizing the importance of Hall's Corner in the community's economy and wanting to serve the needs and wants of Duxbury's residents as well as the business owners within Hall's Corner, the Duxbury Economic Advisory Committee (EAC) and Town Manager René J. Read on behalf of the Town of Duxbury requested that the Old Colony Planning Council (OCPC) conduct a study that analyze the market conditions, traffic patterns and parking turnover in Hall's Corner utilizing funding from the Massachusetts Department of Housing and Community Development (DHCD) District Local Technical Assistance (DLTA) program. This Economic Development and Transportation Study analyzes each of these conditions within Hall's Corner and offers a series of recommendations in an effort to improve the overall condition of the area.

To understand the present market, traffic and parking realities in Hall's Corner, a variety of both quantitative and qualitative data was collected and analyzed. To obtain the perspective of stakeholders, a series of meetings were held to gather the input and thoughts of various town boards, town officials and residents alike. Additionally, both a Customer Survey and Business Survey were developed to give all residents, workers, and businesses in Hall's Corner an opportunity to share their opinions about Hall's Corner. Both surveys proved to be quite successful, with the Customer Survey yielding 348 responses and the Business Survey yielding responses from 26 businesses in Hall's Corner. All of this information was then used to draft a series of recommendations aimed at improving the market, traffic and parking conditions in Hall's Corner.

### 3.0 FINDINGS AND RECOMMENDATIONS FROM PREVIOUS STUDIES

This section provides a summary of existing plans and studies that helped to inform and affect the recommendations of this Economic Development and Transportation Study. The town's previously prepared documents have been reviewed in order to help strengthen OCPCs understanding of past and current plans dealing with economic development, housing, traffic, and parking matters within town. The following documents have been reviewed, with relevant goals, policies, and recommendations presented in this section of the study.

- Town of Duxbury Comprehensive Plan, December, 1999
- Town of Duxbury Community Development Plan, June 2004
- Town of Duxbury Housing Production Needs Assessment, April 2014

#### Town of Duxbury Comprehensive Plan, December 1999

#### (John Brown Associates, Daylor Consulting Group and Bluestone Planning Group)

The Duxbury Comprehensive Plan analyzed a variety of aspects related to the future growth of the community, including land use, economic activity, natural and cultural resources, housing, public facilities and services and transportation. The Plan included an assessment of existing resources and issues, projections of future conditions and needs, and consideration of collective goals and desires. The Plan was also created to serve as a policy-type guide and provided recommendations for future land use and the physical development of the town. It not only addressed land use and infrastructure resources, but also the economic, natural and cultural resources of the town.

Goals, Policies & Recommendations specific to Hall's Corner included:

#### Land Use

- Recognize that large commercial development will have an adverse impact on the rural nature of the community.
- Manage growth to minimize negative financial impacts from new development.
- Support and strengthen the kinds of local businesses that are beneficial to the community in terms of providing needed services, products, employment, and tax revenue.
- Maintain high standards of design, construction, and maintenance in existing and new commercial developments.
- Coordinate vehicular traffic, pedestrian traffic and parking in commercial areas so that they function in an optimal manner.
- Encourage limited amounts of office and high technology uses in existing neighborhood business districts that will yield net tax revenues to the town.
- Seek other desirable land uses (senior assisted living, private schools, etc.) that fit the community and may yield net tax revenues, provided they are not disruptive to the residential community or the environment.
- Improve and enforce design review procedures for nonresidential and multifamily uses.
- Seek to accommodate (with appropriate design controls) shops and garages for small and medium sized trade, service companies, and contractors yards who serve town residents and businesses.

#### Economic Base

- Recognize that large commercial development will have an adverse impact on the rural nature of the community.
- Manage growth to minimize negative financial impacts from new development.
- Support and strengthen the kinds of local businesses that are beneficial to the community in terms of providing needed services, products, employment, and tax revenue.

- Maintain high standards of design, construction, and maintenance in existing and new commercial developments.
- Coordinate vehicular traffic, pedestrian traffic and parking in commercial areas so that they function in an optimal manner.
- Encourage limited amounts of office and high technology uses in existing neighborhood business districts that will yield net tax revenues to the town.
- Seek other desirable land uses (senior assisted living, private schools, etc.) that fit the community and may yield net tax revenues, provided they are not disruptive to the residential community or the environment.
- Do not expand neighborhood business zones except for a possible modest expansion of the Bennett's Corner District.
- Improve and enforce design review procedures for nonresidential and multifamily uses.
- Seek to accommodate (with appropriate design controls) shops and garages for small and medium sized trade, service companies, and contractors yards who serve town residents and businesses.

#### Transportation

- Study the roadway network, paying particular attention to vehicular traffic/ pedestrian conflicts.
- Encourage options for better management of traffic circles at Hall's Corner and other intersections in Town.
- Encourage access linking of major public uses with private commercial uses to provide for easy circulation throughout the Town.
- Resist development pressures that would increase the amount of commercially zoned land within the town; prohibit high traffic generators from locating in the business districts.
- Develop appropriate plans to improve bike safety on existing roads.
- Improve sidewalks and create multi-use path systems between residential areas and popular destinations to meet the needs of pedestrians and bicyclists.
- Strictly adhere to regulations relating to circulation, infrastructure, and traffic safety during the development review process.
- Create more pedestrian friendly environments in business areas by regulating the location of access drives, controlling the location and number of parking spaces on each site, and requiring sidewalk connections between businesses and nearby residences.
- Encourage the use of traffic calming techniques.

#### Town of Duxbury Community Development Plan, June 2004

##### (Duxbury Community Development Steering Committee & Dufresne-Henry, Inc.)

The Community Development Plan was designed to serve multiple community needs. Funded by the State's Executive Order 418 Program, the plan's primary purpose was to serve town boards and organizations, including the Selectmen and the Planning Board with a framework for expanding affordable housing and economic development within the community. The Plan is based on a thorough analysis of social, economic, environmental and land use trends and conditions in Duxbury.

The Plan was also designed to serve as the basis for land-use regulations and to bolster applications for local and state grants for various community projects, and guide private decision making on new housing development and business growth. The Plan also identifies issues that require further investigation, planning or design, and provides a framework of specific strategies needed to accomplish community goals and objectives.

Recommendations specific to Hall's Corner included:

- Work with the owners of the Grand Union Plaza to replace the supermarket with a similar tenant that will serve the daily needs of surrounding neighborhoods and the entire community.
- Consider expanding the center island (flagpole) at the 5-street intersection for better directional flow and aesthetics. Enhancements may improve safety and circulation, reduce pavement and create an attractively landscaped centerpiece for the district.
- Retain on-street parking and expand off-street parking behind and on the side of buildings where possible; encourage internal connections between off-street parking lots where possible.
- Encourage village design with mixed-use buildings of 1 ½ to 2 stories, minimal front setbacks and required sidewalks, parking behind buildings, attractive signage, and traditional architecture.
- Encourage more outdoor uses such as sidewalk dining by amending conflicting local regulations.
- Encourage infill development where appropriate to enhance village setting including areas where existing building are setback long distances, and 1-story buildings that may provide new 2nd floor business and residential opportunities adding to the vitality of the district.
- Develop a streetscape improvement plan that can be implemented in phases over the next 10 years including the replacement of existing ornamental trees with larger shade trees, and repairing and extending the sidewalk network in the district.
- Investigate current sewage capacity in the area.
- Promote the use of bike racks.

Town of Duxbury Housing Production Needs Assessment, April 2014  
(LDS Consulting Group, LLC)

The goal of the Housing Production Needs Assessment is to identify the supply and demand for affordable housing in Duxbury and provide a strategic plan to assist the Town in determining how it should best direct and leverage its resources to meet the affordable housing needs in Duxbury. Prior to this plan, Duxbury had already taken steps to create additional affordable housing in town by creating the Duxbury Affordable Housing Trust.

Recommendations specific to Hall's Corner included:

- Encourage affordable housing development in areas in close proximity to retail and services such as those located in Neighborhood Business Zones, such as Hall's Corner among a number of others.

## **4.0 EXISTING CONDITIONS**

### **4.1 Overview of the Study Area**

Hall's Corner is located in South Duxbury at the intersection of Bay Road, Chestnut Street, Depot Street, Washington Street and Standish Street. At just over 20 acres, this area serves as the largest of the nine commercial areas in town. Within Hall's Corner itself are three distinct "business areas". The strip mall, which consists of the local grocery store, drugstore, post office and bank; the Marketplace, which consists of four rows of retail shops and offices situated perpendicular to the road; and the neighborhood traffic circle, which is at the intersection of the five aforementioned roadways and consists of miscellaneous shops, dining establishments and a gas station. Zoning within the study area consists of two separate zoning districts - Neighborhood Business District 1 (NB1) and Neighborhood Business District 2 (NB2). NB1 serves as the predominant zoning district in the study area, covering the strip plaza, the Marketplace and the southern half of the study area, and NB2 serves the parcels directly abutting the traffic circle.

For the purposes of this study, the study area consists of 30 parcels totaling 20.059 acres. The study area consists of 176,911 total square feet of finished area and had an assessed value of \$25,386,595 (2013). The three largest landowners in Hall's Corner are Dux Limited Partnership, which owns the three parcels that form the Marketplace; Trapelo Realty Inc., which owns the two parcels that form the strip mall; and 24 Standish Street Realty Trust, which owns the one parcel on which Eagles Nest Tree & Landscape is located. A map of the study area can be found in Figure A: Hall's Corner Study Area on the following page.

Figure A: Hall's Corner Study Area

## 4.2 Business Mix

Fieldwork conducted in Summer 2014 identified a total of 86 business establishments in Hall's Corner. The establishments are categorized according to the North American Industry Classification System (NAICS) by major sector in Table 1 and listed individually by sector in Table 2, which are located below.

Retail Trade businesses account for slightly more than a quarter of all the establishments in Hall's Corner. A variety of retail establishments are currently offered in Hall's Corner with the most common establishments being gift stores (4), liquor stores (2) and jewelry stores (2). Other retail establishments in Hall's Corner include a convenience store, drugstore, florist, bookstore, clothing store, toy store, sporting goods store, candy store, pet store, carpet store, yarn store, thrift and consignment shop, a Christian Science Reading Room/Bookstore and a gas station.

Service establishments also account for a large number of the businesses in Hall's Corner, with Other Service businesses accounting for 17% of the establishments. These services are all of the personal service variety and include drycleaners (5), hair salons (5), and nail/skin salons (5). Professional, Scientific, and Technical Service businesses account for 14% of the establishments and consist primarily of lawyers and architects. Finance and Insurance service businesses account for 9% of the establishments and consist primarily of banks and insurance agencies.

Accommodations & Food Services establishments account for slightly more than 10% of the establishments in Hall's Corner with the majority being categorized as either quick-service or fast-casual restaurants.

Other types of businesses in Hall's Corner include four (4) Construction establishments, four (4) Healthcare & Social Assistance establishments, three (3) Arts, Entertainment & Recreation establishments, three (3) Real Estate Rental & Leasing establishments, two (2) Administrative and Support and Waste Management and Remediation Services establishments, and one (1) each of the following establishments: Educational Services, Public Administration, and Transportation and Warehousing.

**Table 1: Establishments by NAICS Category**

Category	NAICS (2 Digit Code)	Number of Establishments	% of Businesses in Hall's Corner
Retail Trade	44-45	23	26.7%
Other Services	81	15	17.4%
Professional, Scientific, and Technical Services	54	12	14.0%
Accommodations & Food Services	72	9	10.5%
Finance & Insurance	52	8	9.3%
Construction	23	4	4.7%
Health Care & Social Assistance	62	4	4.7%
Arts, Entertainment & Recreation	71	3	3.5%
Real Estate Rental & Leasing	53	3	3.5%
Administrative and Support and Waste Management and Remediation Services	56	2	2.3%
Educational Services	61	1	1.2%
Public Administration	92	1	1.2%
Transportation and Warehousing	48-49	1	1.2%

## **5.0 OPINION RESEARCH**

In cooperation with the Town of Duxbury, the Duxbury Business Association and a number of businesses in Hall's Corner, OCPC and the Duxbury Economic Advisory Committee conducted both a Customer Survey and a Business Survey in an effort to obtain the thoughts and opinions of both customers and businesses in regards to Hall's Corner.

### **5.1 Customer Survey**

The goal of the Customer Survey was to gain an understanding of the local habits, preferences, and perceptions that Duxbury residents, workers, and visitors have about Hall's Corner. The survey focused on shopping habits, with an emphasis toward improving retail amenities and opportunities in Hall's Corner and asked questions about when and where people shop, what type of merchandise they shop for, what types of additional businesses they would like to see in Hall's Corner and what influences their choice of store.

The survey could be completed either online or in paper format. A link to the survey was available on the Town of Duxbury, Duxbury Business Association, and the South Shore Chamber of Commerce's Marshfield, Pembroke & Duxbury Business Council websites and paper copies of the survey were available at Duxbury Town Hall, the Duxbury Council on Aging, and the Duxbury Free Library. The survey was also advertised via the Town of Duxbury email notification system, the Duxbury Clipper and Patriot Ledger newspapers as well as in the shops of five local businesses in Hall's Corner (Depot Street Market, Foodie's, Sportworks, The Studio, and Westwinds Bookshop). The survey was available for a total of twenty-three days from May 21 through June 13, 2014. In total, 348 surveys were collected. Results of the survey can be found in Appendix 2 of this study.

#### *Summary of Survey Findings:*

- The primary purposes for visiting Hall's Corner were for shopping and dining experiences.
- The majority (79.3%) of respondents utilize the businesses in Hall's Corner at least weekly.
- Hall's Corner is utilized as a convenience shopping area, with the most frequented business being of the convenience variety, such as Foodies, Dunkin Donuts, Rite-Aid, Duxbury Pizza and the Post Office.
- Major advantages include its convenience and personalized friendly service.
- Major disadvantages include its limited selection of goods and services, limited store hours, and high prices.
- A sizeable number (44.1%) of respondents indicated that they tend to patronize businesses in Hall's Corner more during the summer months.
- An overwhelming majority of people do most of their shopping outside of Duxbury and Hall's Corner altogether, due to its limited selection of businesses and high prices. They tend to do most of their shopping in the adjacent communities of Kingston, Plymouth and Marshfield due to their greater selection of businesses and lower prices.
- Desirable new businesses include restaurants (sit-down, take-out and café/bakeries), hardware/garden store and clothing/accessory shops.
- Desired changes include addressing traffic flow at the neighborhood traffic circle, having better pedestrian amenities, increasing the variety/selection of businesses (most notably restaurants), as well as improving/updating the appearance of the area.
- The desired identity or image most would like to see for Hall's Corner is that of a quaint, traditional New England coastal village, similar to Downtown Hingham or Scituate Harbor.

## 5.2 Business Survey

To get a sense of the thoughts and views of the businesses in Hall's Corner, Mr. Kurt Franke and Mr. Clark Hinckley of the Duxbury Economic Advisory Committee conducted interviews and an informal survey with the personnel of 26 businesses located in Hall's Corner. The observations gathered below are a result of these interviews and informal survey:

- All interviewees felt they would benefit if there were more “destination” shops and/or services in Hall's Corner.
- The Halls Corner Business District would benefit from a reintroduction to Duxbury residents or an introduction to nearby communities via some type of marketing effort.
- It is felt that a chicken vs. egg phenomenon exists, meaning that it is difficult to attract new and vibrant business investment without already having an existing vibrant business environment. Halls Corner while having many successful enterprises would not be considered a thriving business community. In fact, several of the “destination” businesses are currently for sale.
- Many of the current businesses seem to be “hobby” businesses, those where the owner's livelihood is not directly impacted by the success of the business.
- Parking is an issue for some businesses but not all. Overall it is not as big an issue as expected. Those mostly impacted were the businesses located directly around the flagpole.
- The neighborhood traffic circle and traffic in Hall's Corner is a huge problem for pedestrians and parking. A solution is desperately needed, particularly on the Chestnut Street approach. (Perhaps a STOP painted on the road like it is on other roads....something needs to be done.)
- The town could be more business friendly. Signage restrictions are an issue for some. There is no seating available in shopping areas and town owned sidewalks and infrastructure are shabby.
- Many current Duxbury shoppers are willing to spend substantial money on goods and services but the good and services they desire are not available in Hall's Corner. (These shoppers are instead attracted to higher-end retail lifestyle centers such as the Derby Street Shoppes in Hingham). Younger shoppers (20-30 some-things) spend more on generic items, which are also not available in Hall's Corner.
- Hall's Corner is not especially conducive to out-of-towners as a go-to destination shopping area; rather it focuses on serving the local population.
- Many Duxbury residents are not aware of the existing businesses in Hall's Corner.

### 5.3 Strengths, Weaknesses, Opportunities and Threats (SWOT) Analysis

Based upon a combination of field visits, a walking tour, review of study materials, and public outreach, several common themes began to develop as part of a competitive assessment of Hall's Corner. These themes were categorized as Strengths, Weaknesses, Opportunities, and Threats.

#### Strengths

- Safe, friendly community with historic character.
- Superior level of service provided by area shop owners.
- Local retail market area is affluent with incomes well above County and State medians.
- Existing businesses accommodate most of shoppers' day-to-day needs with grocery, pharmacy, banking, gas, and many business services.
- Majority of businesses are owned by local entrepreneurs.
- Very low commercial vacancy rate.
- Duxbury Beach is an important nearby attraction, which draws a number of recreational visitors through Hall's Corner.
- The presence of a number of historical attractions, including the Myles Standish Monument, the Duxbury Rural & Historic Society's Historic Houses and the Alden House Historic Site.
- The Duxbury Business Association and Duxbury Economic Advisory Committee serve as an advocate for businesses in Duxbury.
- Holly Days is a positive community event that occurs in Hall's Corner.

#### Weaknesses

- Numerous service/office tenants occupy ground floor space in prime retail locations and disrupt the shopping flow and potential for retail critical mass.
- The lack of retail variety.
- Limited business hours - most businesses are closed by 6:00 PM at the latest.
- Amalgamation of typical downtown storefront street retail and strip center developments make it difficult to project a uniform identity and a challenge for the area to coalesce.
- Some storefronts and facades are in need of updating and are viewed as tired or rundown by residents and businesses. There are currently no incentives for property development such as façade or storefront improvement funds/grants.
- Limited directional signage makes it harder for shoppers to identify Hall's Corner and other business districts in town.
- The Town does not promote itself well to customers both inside and outside of Duxbury.
- The Town website has a lack of information for prospective businesses.
- Perception of some locals that shopping in Hall's Corner is expensive and very limited.
- Perception that the town is unfriendly toward the business community.
- Parking availability is a concern for some.

#### Opportunities

- 2014 Market Area leakage of \$84 million of retail trade and food and drink within the 5 Minute Drive Time Area. Sales leakage is occurring in all merchandise categories except Liquor Stores, Jewelry and Luggage Stores and Other Motor Vehicle Dealers.
- More retail and restaurant variety is needed. The most frequently requested additional businesses and services noted in the Customer Survey were sit-down restaurants, café/bakery, hardware/garden store and clothing/accessory store.
- There is a lack of upscale retailers to serve the segment of the population which desires high-end apparel and accessories.

- There are a number of recreational, cultural and historical assets within a 20 minute drive.
- Lacks a brand identity, but has the opportunity to reinvent its identity/image through streetscape improvements & redevelopment projects.
- The relocation of industrial businesses within Hall's Corner such as Eagles Nest Tree & Landscape or Phillips Tree Service would result in the availability of rare commercially zoned space which could be used for more intensive retail uses.
- There is an opportunity to attract more customers from other market areas by advertising in regional magazines, periodicals and newspapers as well as the local visitor convention bureau.
- Events like Holly Days are popular but many businesses want more of these events to draw attention to Hall's Corner.

#### Threats

- Significant retail competition from the selection and big box stores of Kingston and Plymouth requires Hall's Corner to focus on unique niches.
- Traffic configuration and layout at the traffic circle is challenging, particularly to those who are from out of town.
- Pedestrian circulation and safety is challenging (especially for families with small children) due to the lack of sidewalks and pedestrian accommodations.
- Lack of sewer may limit or inhibit development/redevelopment opportunities in Hall's Corner.
- Location has limited access and low visibility from high traffic areas such as Route 3, limiting the exposure of businesses in Hall's Corner to potential customers from nearby communities.
- Increase of visitors during the summer months causes a fluctuation in business for some businesses.
- Limited amount of commercially zoned property available in Hall's Corner.

## **6.0 MARKET ANALYSIS**

### **6.1 Trade Area**

A trade area is generally defined as the geographic area from which retailers draw a majority of their customers and provides a basis for understanding the extent and depth of a market and its opportunities. Traditionally, trade areas were defined by drawing concentric rings around a community or specific location. However, concentric rings do not account for physical geography (rivers, streams, mountains), road networks, traffic conditions or human behavior, all of which may influence how and why a consumer shops in a particular area. Because of the limitations with concentric rings, and the fact that most people today shop by convenience, and measure distance in time, not miles, OCPC utilized ESRI Business Analyst Online (BAO) to define trade areas in terms of drive times. Drive times are determined by the time it takes to drive to a community or specific location. Drive times are irregular in shape because of the layout of roads, differences in speed limits and geographic barriers, etc. For the purpose of this analysis, we utilized three common trade areas retailers typically use; 5, 10, and 15 Minute Drive Time Areas. Figure B on the following page illustrates the boundaries of each of Drive Time Area. For the purpose of comparison, Plymouth County was also used in this analysis.

- The 5 Minute Drive Time Area includes the immediate area surrounding Hall's Corner in southeast portion of Duxbury. This area profiles a convenience-oriented market and reflects a total population of 5,272.
- The 10 Minute Drive Time Area includes areas along regional travel routes in the Hall's Corner vicinity and includes a large portion of Duxbury, the eastern half of Kingston, and the southeastern portion of Marshfield. This Drive Time Area reflects a total population of 25,302.
- The 15 Minute Drive Time Area is more expansive and representative of a regional market, and includes all of Duxbury and Kingston, the southern half of Marshfield, the western halves of Pembroke and Plympton, the northern portion of Plymouth and the southern tip of Norwell. This Drive Time Area reflects a total population of 76,620.

**Figure B: Hall's Corner 5, 10 and 15 Minute Drive Time Areas**

## 6.2 Demographic Analysis

Demographic characteristics strongly influence retail shopping habits and preferences. To assist in understanding the characteristics of residents, demographic data was analyzed for the defined retail trade areas and includes population, household, income, age, and education data. Comparing demographics in each of these geographic areas helps to differentiate local consumers and may identify potential customer niches. The data used in this analysis is derived from the US Census Bureau and from Environmental Systems Research Institute (ESRI) Business Analyst Online (BAO), a leading national provider of market information.

### Population & Household Growth

Population is defined as the total number persons living within a specific geographic area. Population data is vital for determining the current market size and growth trends, both of which are essential in determining consumer demand. The populations of each of the three Drive Time Areas as well as the County grew modestly from 2010-2014. This modest rate of growth is expected to continue in each of the Drive Time Areas as well as in the County from 2014-2019, with the highest rate of growth (3.3%) occurring in the 5 Minute Drive Time Area.

Households are defined as all people who occupy a housing unit and include both related family members and unrelated people. Like population data, household data is vital for determining the current market size and growth trends. The number of households in each of the three Drive Time Areas as well as the County grew modestly from 2010-2014, and is expected to continue to grow modestly from 2014-2019, with the highest rate of growth (3.5%) again occurring in the 5 Minute Drive Time Area. While the number of households has grown and is expected to continue to grow modestly, the average household size in all three Drive Time Areas as well as the County is expected to continue to decrease in size which is consistent with national trends.

**Table 3: Market Area Population & Household Growth**

	<b>5 Minute Drive Time Area</b>	<b>10 Minute Drive Time Area</b>	<b>15 Minute Drive Time Area</b>	<b>Plymouth County</b>
<b>Population</b>				
2010 Census	5,133	24,840	74,962	494,919
2014 Estimate	5,272	25,302	76,620	505,505
2019 Projection	5,444	25,958	78,747	519,056
% Change 2010-14	2.7%	1.9%	2.2%	2.1%

2019 Projection	2.71	2.64	2.58	2.64
% Change 2010-14	(.03%)	(.11%)	(.07%)	(.07%)
% Change 2014-19	(.03%)	(.03%)	(.03%)	(.03%)

### Income

Income is a strong indicator of the spending potential of a particular area, as it often correlates with retail expenditures. Two commonly used measures of income data are median household income and per capita income. Median household income is defined as the amount which divides the household income distribution into two equal groups, half having household incomes above the median, half having household incomes below the median. Per capita income is defined as the average income computed for every man, woman, and child in a particular group. The distribution of household incomes is also included, as some retailers seek a minimum number of households within a certain income range.

Both the median household and per capita income levels within the three Drive Time Areas are well above that of the County and are highest in the 5 Minute Drive Time Area. The 5 Minute Drive Time Area is also expected to experience the highest increase in both categories over the next five years. The Five Minute Drive Time Area also has the highest percentage of households with incomes exceeding \$100,000, with approximately 69.1% of households doing so, compared to 37.8% of households in the County.

**Table 4: Market Area Income**

	<b>5 Minute Drive Time Area</b>	<b>10 Minute Drive Time Area</b>	<b>15 Minute Drive Time Area</b>	<b>Plymouth County</b>
<b>Median Household Income</b>				
2014 Estimate	\$144,314	\$115,734	\$89,156	\$76,321
2019 Projection	\$172,248	\$137,544	\$101,973	\$84,667
% Change 2014-19	19.4%	18.8%	14.4%	10.9%
<b>Per Capita Income</b>				
2014 Estimate	\$66,268	\$53,415	\$43,394	\$36,427
2019 Projection	\$80,574	\$64,024	\$51,197	\$42,307
% Change 2014-19	21.6%	19.9%	18.0%	16.1%
<b>Household Income (2014 Estimates) (Number and Percent of Households)</b>				
Less than \$50,000	295 (15.2%)	1,950 (20.7%)	8,467 (29.5%)	62,585 (33.6%)
\$50,000-\$74,999	151 (7.8%)	1,050 (11.1%)	3,867 (13.4%)	28,900 (15.5%)
\$75,000-\$99,999	153 (7.9%)	923 (9.8%)	3,273 (11.4%)	24,327 (13.1%)
\$100,000-\$149,999	403 (20.8%)	1,953 (20.7%)	5,902 (20.5%)	37,804 (20.3%)
\$150,000-\$199,999	302 (15.6%)	1,753 (18.5%)	3,791 (13.2%)	17,774 (9.5%)
\$200,000+	635 (32.7%)	1,824 (19.3%)	3,475 (12.1%)	14,961 (8.0%)

### Age

Age often affects a person's tastes and preferences which often change as they become older. Understanding the ages of the population within an area helps businesses effectively address the needs of the market. The median age is higher in each of the three Drive Time Areas when compared to the County averages, with the 5 Minute Drive Time Area having the highest median age. The data tracking company Nielsen notes the importance of the aging population and their spending power by noting that by 2017 almost half of the U.S. adult population will be 50 and older and will control a full 70% of the nation's disposable income.

**Table 5: Market Area Age Profile**

	5 Minute Drive Time Area	10 Minute Drive Time Area	15 Minute Drive Time Area	Plymouth County
<b>Median Age</b>				
2010 Census	44.9	43.8	42.2	41.1
2014 Estimate	46.8	45.6	43.3	42.0
2019 Projection	48.7	46.8	44.2	42.6
% Change 2010-14	4.2%	4.1%	2.6%	2.2%
% Change 2014-19	4.1%	2.6%	2.1%	1.4%
<b>Age Profile (2014 Estimates) (Number and Percent of Population)</b>				
Under 15	1,090 (20.6%)	4,870 (19.3%)	14,063 (18.3%)	94,109 (18.7%)
15-24	695 (13.2%)	3,073 (12.1%)	9,215 (12.0%)	64,132 (12.7%)
25-34	240 (4.6%)	1,892 (7.5%)	7,765 (10.1%)	53,863 (10.7%)
35-44	443 (8.4%)	2,580 (10.2%)	8,952 (11.7%)	60,889 (12.0%)
45-54	962 (18.2%)	4,320 (17.1%)	12,561 (16.4%)	80,229 (15.9%)
55-64	842 (16.0%)	4,024 (15.9%)	11,153 (14.6%)	71,511 (14.1%)
65-74	594 (11.3%)	2,699 (10.7%)	7,478 (9.8%)	47,324 (9.4%)
75+	406 (7.7%)	1,844 (7.3%)	5,431 (7.1%)	33,448 (6.6%)

#### Educational Attainment

Educational attainment is defined as the highest grade of school one has completed or the highest degree one has received. There is a strong correlation between educational attainment and income levels; U.S. Bureau of Labor Statistics data shows that the median weekly earnings of a full-time, bachelor's degree holder in 2013 were 70 percent higher than those of a high school graduate (\$1,108 compared to \$651). The populations within the 5, 10, and 15 Minute Drive Time Areas are all well-educated and have higher levels of education than the County average, with the population within the 5 Minute Drive Time Area having the highest percentage of people holding either a Bachelor's or Graduate/Professional Degree, with 75.1% doing so, compared to 32.9% of the population of the County.

**Table 6: Market Area Educational Attainment (25+)**

	5 Minute Drive Time Area	10 Minute Drive Time Area	15 Minute Drive Time Area	Plymouth County
<b>Educational Attainment (2014 Estimates) (Number and Percent of Population)</b>				
Less than 9 <sup>th</sup> Grade	10 (0.3%)	139 (0.8%)	907 (1.7%)	10,071 (2.9%)
9 <sup>th</sup> -12 <sup>th</sup> Grade, No Diploma	38 (1.1%)	365 (2.1%)	1,920 (3.6%)	18,058 (5.2%)
High School Graduate	245 (7.0%)	2,951 (17.0%)	13,442 (25.2%)	105,221 (30.3%)
Some College, No Degree	418 (12.0%)	2,882 (16.6%)	10,081 (18.9%)	66,675 (19.2%)
Associate Degree	157 (4.5%)	1,250 (7.2%)	4,534 (8.5%)	32,990 (9.5%)
Bachelor's Degree	1,611 (46.2%)	6,024 (34.7%)	14,402 (27.0%)	73,967 (21.3%)
Graduate/Professional Degree	1,008 (28.9%)	3,767 (21.7%)	8,108 (15.2%)	40,283 (11.6%)

### 6.3 Market Segmentation

Market segmentation is defined as the classification of consumers according to demographic, socioeconomic and housing characteristics, lifestyles and product preferences. It is based on the theory that “birds of a feather flock together”; that is, people with similar tastes, lifestyles, and behaviors naturally gravitate toward each other and into the neighborhoods in which they live. Segmentation allows companies and organizations to better understand their consumers/constituents, their shopping patterns, and media preferences, so that they can supply them with the services and products they desire.

Market segmentation data for this analysis was obtained by utilizing the ESRI Tapestry Segmentation system, which classifies neighborhoods into 67 unique market segments based on their socioeconomic and demographic compositions by using more than 60 data attributes to identify and cluster neighborhoods including age, race, household type, housing type, education, employment, and income among others. (Data sources used to develop the ESRI Tapestry Segmentation system include Census 2010 data, ESRI proprietary demographic updates, Acxiom Corporation’s InfoBase-X consumer database and national consumer surveys, such as the Survey of the American Consumer from GfK MRI).

Table 7 shows and compares the concentrations of the top five Tapestry Segments found within each of the Hall’s Corner Drive Time Areas.

**Table 7: Comparative View of Predominant Tapestry Segments**

	5 Minute Drive Time Area			10 Minute Drive Time Area			15 Minute Drive Time Area		
	Count	Pct.	Rank	Count	Pct.	Rank	Count	Pct.	Rank
1A - Top Tier	1,599	82.5%	1	1,981	21.0%	2	1,981	6.9%	4
1E - Exurbanites	339	17.5%	2	1,592	16.8%	3	2,406	8.4%	3
1D- Savvy Suburbanites	1	0.0%	3	3,005	31.8%	1	7,418	25.8%	1
2B - Pleasantville	0	0.0%	--	712	7.5%	4	5,621	19.5%	2
6C - The Great Outdoors	0	0.0%	--	650	6.9%	5	650	2.3%	14
8A - City Lights	0	0.0%	--	0	0.0%	--	1,673	5.8%	5
Count/Pct. of Area	1,939	100.0%	--	7,940	84.0%	--	19,749	68.7%	--

Brief descriptions as well as demographic characteristics for the top five Tapestry Segments found within each of the drive time areas can be found on the following pages. Information on ESRI Tapestry methodology and applications, along with full descriptions for the Tapestry’s 67 segments can be found in the ESRI Tapestry Segmentation Reference Guide at:

<http://www.esri.com/library/brochures/pdfs/tapestry-segmentation.pdf>

#### Segment 1A - Top Tier

The residents of the wealthiest Tapestry market, *Top Tier*, earn more than three times the US household income. They have the purchasing power to indulge any choice. Aside from the obvious expense for the upkeep of their high-end homes, consumers select upscale salons, spas, and fitness centers for their personal well-being and shop at high-end retailers for their personal effects. Whether short or long, domestic or foreign, their frequent vacations spare no expense. Residents fill their weekends and evenings with opera, classical music concerts, charity dinners, and shopping. These highly educated professionals have reached their corporate career goals. With an accumulated average net worth of over 1.5 million dollars and income from a strong investment portfolio, many of these older residents have moved into consulting roles or operate their own businesses.

#### Segment 1E – Exurbanites

*Exurbanites* residents are approaching retirement but show few signs of slowing down. They are active in their communities, generous in their donations, and seasoned travelers. They take advantage of their proximity to large metropolitan centers to support the arts, but prefer a more expansive home style in less crowded neighborhoods. They have cultivated a lifestyle that is both affluent and urbane.

#### Segment 1D – Savvy Suburbanites

*Savvy Suburbanites* residents are well educated, well read, and well capitalized. Families include empty nesters and nearly empty nesters, who still have adult children at home. Located in older neighborhoods outside the urban core, their suburban lifestyle includes home remodeling, gardening and sports and exercise. They enjoy good food and wine, plus the amenities of the city's cultural events.

#### Segment 2B – Pleasantville

Prosperous domesticity best describes the settled denizens of *Pleasantville*. Situated principally in older housing in suburban areas in the Northeast and the West, these slightly older couples move less than any other market. Many couples have already transitioned to empty nesters; many are still home to adult children. Families own older, single-family homes and maintain their standard of living with dual incomes. These consumers have higher incomes and home values and much higher net worth. Older homes require upkeep; home improvement and remodeling projects are a priority—preferably done by contractors. Residents spend their spare time participating in a variety of sports or watching movies. They shop online and in a variety of stores, from upscale to discount, and use the Internet largely for financial purposes.

#### Segment 6C - Great Outdoors

These neighborhoods are found in pastoral settings throughout the United States. Consumers are educated empty nesters living an active but modest lifestyle. Their focus is land. They are more likely to invest in real estate or a vacation home than stocks. They are active gardeners and partial to homegrown and home-cooked meals. Although retirement beckons, most of these residents still work, with incomes slightly above the US level.

#### Segment 8A - City Lights

*City Lights*, a densely populated urban market, is the epitome of equality. The wide-ranging demographic characteristics of residents mirror their passion for social welfare and equal opportunity. Household types range from single person to married-couple families, with and without children. A blend of owners and renters, single-family homes and town homes, midrise and high-rise apartments, these neighborhoods are both racially and ethnically diverse. Many residents have completed some college or a degree, and they earn a good income in professional and service occupations. Willing to commute to their jobs, they work hard and budget well to support their urban lifestyles, laying the foundation for stable financial futures.

**Table 8: Demographic Characteristics of Top Tapestry Segments**

<b>Tapestry Segment</b>	<b>Median Household Income</b>	<b>Median Age</b>	<b>Predominant Household Type</b>	<b>Predominant Housing Style</b>	<b>Predominant Employment</b>	<b>Predominant Education</b>	<b>Predominant Race</b>
1A-Top Tier	\$157,000	46.2	Married Couples	Single Family	Professional, Management	College Degree	White
1E-Exurbanites	\$98,000	49.6	Married Couples	Single Family	Professional, Management	College Degree	White

## 6.4 Retail Leakage/Surplus Analysis

The Retail Leakage/Surplus Analysis section examines retail trends in each of the three trade areas by comparing existing retail sales (supply) in each trade area with the retail potential (demand) of each trade area, as shown in Tables 9-11. This analysis is helpful in identifying potential market opportunities in each of the three trade areas.

ESRI's Retail MarketPlace Profile was utilized to obtain this data. ESRI uses the North American Industry Classification System (NAICS) to classify businesses by their primary type of economic activity. Retail establishments are classified into 27 industry groups within the Retail Trade sector and four industry groups within the Food Services and Drinking Establishments government data sources, including the Dun and Bradstreet business database, the U.S. Census Bureau's Census of Retail Trade (CRT), Monthly Retail Trade Survey (MRTS) and Nonemployer Statistics (NES) as well as the U.S. Bureau of Labor Statistics.

### Sales Leakage

Sales leakage is a measure of retail sales lost by one market to a competitive market. Leakage occurs because consumers are making purchases at businesses outside of a particular market area, including purchases made online and via mail order. For example, if residents of a particular trade area are spending a total of \$1 million annually on home furnishings, but total trade area home furnishings sales are only \$300,000, it is assumed that \$700,000 of home furnishings sales are "leaking" out of the trade area, meaning that some home furnishings are being purchased elsewhere. While sales leakages can be viewed as an opportunity to recapture lost sales, not all retail categories that exhibit leakage within a particular study area should be assumed to be a good fit for that specific trade area. There are many reasons why a business might succeed or fail and the retail market is just one factor. It is also unlikely that all sales leakage occurring in a category would be recaptured if additional retailers in that specific retail category located to Hall's Corner. Conversely, a sales surplus occurs when the supply of goods exceeds an area's demand and therefore is likely attracting customers that reside outside of the trade area. Sales surpluses may result due to the presence of a specialty retail cluster in a particular area or due to simple market saturation. It is important to note that such an analysis is not an exact science and that this analysis focuses on retail categories where households (not businesses) are essentially the only consumer group.

- The 5 Minute Drive Time Area generated an estimated \$107 million in annual sales, but only captured an estimated \$23 million (or 21.4%), with an estimated \$84 million leaking from the trade area annually.
- The 10 Minute Drive Time Area generated an estimated \$433 million in annual sales and captured an estimated \$315 million (or 72.8%), with an estimated \$117 million leaking from the trade area annually.
- The 15 Minute Drive Time Area generated an estimated \$1.127 billion in annual sales, and captured an estimated \$999 million (or 88.6%), with an estimated \$129 million leaking from the trade area annually.

According to the Sales Leakage Analysis, there are industries in each of the three trade areas suffering from sales leakage. The 5 Minute Drive Time Area trade area experiences the most leakage of the three, with just three industry subcategories reporting a surplus in sales.

**Table 9: Sales Leakage Analysis - 5 Minute Drive Time**

<b>Industry Group (NAICS Number)</b>	<b>Demand (Retail Potential)</b>	<b>Supply (Retail Sales)</b>	<b>Retail Opportunity Gap/Surplus</b>	<b>Percent of Demand Being Met</b>

## **7.0 TRANSPORTATION AND SAFETY ANALYSIS**

### **7.1 Site Description**

Hall's Corner is located at the intersection of Bay Road, Chestnut Street, Depot Street, Washington Street, and Standish Street in South Duxbury.

#### Depot Street

Depot Street is a two lane roadway that connects Route 3A to Hall's Corner from the northwest. The Depot Street approach to Hall's Corner is controlled by a stop sign. There is a sidewalk on the northbound side of the roadway, connecting from the traffic circle up to the northern end of the business district. There is informal parallel street parking adjacent to the VERC/Dunkin Donuts building on the approach to the intersection.

#### Washington Street

Washington Street is a two lane roadway that connects Hall's Corner northeastward to residential areas of Duxbury, and is the primary access to Snug Harbor and Duxbury Beach from South Duxbury. There is a sidewalk on the northeast-bound side of the roadway. The Washington Street approach to Hall's Corner is controlled by a stop sign, and the approach is flared to allow two vehicles to queue side-by-side.

#### Standish Street

Standish Street is a two lane roadway, providing the only access between Hall's Corner and residential areas on the peninsula south of Hall's Corner. It also provides access to Myles Standish State Park. A sidewalk is located on the northbound approach to Hall's Corner along the street-side businesses. The Standish Street approach to Hall's Corner is controlled by a stop sign. Striped parallel street parking is located on the east side of the roadway.

#### Bay Road

Bay Road is a two lane roadway connecting Hall's Corner to Loring Street and Landing Road in south Duxbury and Kingston. Paralleling Route 3A and Kingston Bay, it provides access to primarily residential areas as well as providing a connection to Route 3A, Route 106, Route 80, and Route 3 in Kingston. The Bay Road approach to Hall's Corner is controlled by a stop sign. No sidewalks are present on Bay Road.

#### Chestnut Street

Chestnut Street is a two lane roadway connecting between Hall's Corner and Route 3A to the west. It is the only approach to Hall's Corner that does not have any signed control, allowing free flow of vehicles into the traffic circle (although by default yielding to traffic already in the traffic circle). Both sides of Chestnut Street at the intersection have perpendicular parking in front of businesses.

While not designed as a traditional modern roundabout, the intersection at Hall's Corner where these five roads meet operates similar to a roundabout in that traffic is directed to circulate counterclockwise around a small island. Signage on the central island containing the flagpole in Hall's Corner directs drivers to keep to the right. Currently Hall's Corner operates as a neighborhood traffic circle. To differentiate the differences between roundabouts, rotaries and neighborhood traffic circles the National Cooperative Highway Research Program (NCHRP) published the *Roundabouts: An Informational Guide (Report 672)* in 2010 which provides the following definitions of a roundabout, a rotary, and a neighborhood traffic circle, which are included below:

### *Roundabout*

A roundabout is a form of circular intersection in which traffic travels counterclockwise (in the United States and other right-hand traffic countries) around a central island and in which entering traffic must yield to circulating traffic (Roundabouts: An Informational Guide, NCHRP, 672).

### *Rotary*

A rotary is an old-style circular intersection common to the United States prior to the 1960s, which is characterized by a large diameter (often greater than 300 feet). Unlike the modern roundabout, lane changes are typically required within a rotary for some movements. Circulating speeds are high due to the large diameter, making maneuvers within the circle more challenging (Roundabouts: An Informational Guide, NCHRP, 672).

### *Neighborhood Traffic Circle*

Neighborhood traffic circles are typically built at the intersections of local streets for reasons of traffic calming and/or aesthetics. The intersection approaches may be uncontrolled or stop-controlled. They do not typically include raised channelization to guide the approaching driver onto the circulatory roadway. At some traffic circles, left-turning movements for larger vehicles are allowed to occur in front of the central island, potentially conflicting with other circulating traffic (Roundabouts: An Informational Guide, NCHRP, 672).

## **7.2 Traffic Conditions**

### Mainline Traffic Volumes

Traffic data was collected at two different time periods: the week of May 12<sup>th</sup>, 2014 (representing off-peak conditions) and the week of July 8<sup>th</sup>, 2014 (representing peak summer season conditions).

**Table 12: Hall's Corner Traffic Volumes, May and July, 2014**

Location	Average Daily Traffic		Difference	% Change
	Spring Off-Peak May 13-14, 2014	Summer Peak July 9-10, 2014		
Depot Street, north of Hall's Corner	6,265	6,687	422	6.7%
Chestnut Street, west of Hall's Corner	5,309	5,907	598	11.3%
Washington Street, east of Hall's Corner	4,651	5,659	1,008	21.7%
Depot Street, north of Foodie's Market	4,595	4,726	131	2.9%
Bay Road, west of Hall's Corner	3,143	3,425	282	9.0%
Standish Street, south of Hall's Corner	2,595	3,024	429	16.5%

Along with the recorded average weekday traffic volumes, the data in Table 12 also demonstrates the seasonal change in the traffic pattern from off-peak (spring) to the peak summer months. Traffic in the area increases dramatically during the summer months. Depot Street, Chestnut Street, and Washington Street are the busiest roadways serving Hall's Corner. Bay Road and Standish Street had significantly less traffic volume.

### Intersection Level of Service

Intersection Level of service is a quantitative measure of how efficiently an intersection operates during peak travel demand hours. Typically an intersection will have three peak demand periods during a

typical week: the weekday morning commute (typically between 7:00 and 9:00 AM), the weekday afternoon commute (typically between 4:00 and 6:00 PM), and midday Saturday between 11:00 AM and 1:00 PM. Level of service is determined by the calculated average delay per vehicle during the peak hour, and is based on traffic volume and turning movements during that peak hour, the type of traffic control present, and roadway geometry. A letter grade is assigned to each approach and the intersection overall, ranging from A to F. Turning movements were recorded during the three peak demand periods in both May and July. The intersection was evaluated as a roundabout with stop signs on Depot Street, Washington Street, Standish Street, and Bay Road; and free flow from Chestnut Street. The data in Table 13 summarizes the levels of service from May 2014 while Table 14 contains the levels of service from July 2014.

**Table 13: May 2014 Levels of Service during Peak Hours**

		Intersection Approaches					Intersection Total
		Chestnut Street	Depot Street	Washington Street	Standish Street	Bay Road	
Weekday Morning	Volume	305	138	147	131	154	875
	Delay	9.3	6.2	7.3	8.3	9.2	8.4
	LOS	A	A	A	A	A	A
Weekday Afternoon	Volume	227	245	159	114	95	840
	Delay	7.8	7.4	6.9	6.4	6.6	7.2
	LOS	A	A	A	A	A	A
Saturday Midday	Volume	255	222	180	112	176	945
	Delay	8.2	6.8	8.0	6.7	8.4	7.8
	LOS	A	A	A	A	A	A

**Table 14: July 2014 Levels of Service during Peak Hours**

		Intersection Approaches					Intersection Total
		Chestnut Street	Depot Street	Washington Street	Standish Street	Bay Road	
Weekday Morning	Volume	256	131	131	97	144	759
	Delay	6.9	6.5	6.7	6.6	6.4	6.7
	LOS	A	A	A	A	A	A
Weekday Afternoon	Volume	253	198	170	101	161	883
	Delay	8.5	6.6	7.7	7.6	8.6	7.9
	LOS	A	A	A	A	A	A
Saturday Midday	Volume	319	290	186	140	183	1,118
	Delay	9.3	7.7	7.4	8.2	8.2	8.2
	LOS	A	A	A	A	A	A

Based on the calculated levels of service, all approaches of the intersection as well as the overall function of the intersection performed well during the three peak demand periods in May and July. While the calculated average delay for vehicles during the peak hours is very low, field observation of the intersection during these periods revealed that traffic flow is occasionally disrupted or stopped by vehicles backing into the traffic circle due to the location of parking spaces inside or immediately adjacent to the circle. Occasional short queues of traffic formed during these peak periods, and actual delay may be slightly higher than what the calculated delay indicates.

### Crash History and Crash Rate

Crash data for the intersection was obtained from Massachusetts Registry of Motor Vehicles (RMV) data to determine the crash rate. An intersection crash rate is a quantitative measure of an intersection's safety performance, expressed average number of crashes per million entering vehicles (crashes/MEV) into the intersection. From 2010 through 2012, there were five reportable crashes at the intersection, according to Massachusetts RMV records. The resulting crash rate for the intersection is 0.67/MEV. The crash rate for Hall's Corner is above average for un-signalized intersections in the Massachusetts Department of Transportation (MassDOT) District Five region (southeastern Massachusetts). The average crash rate for un-signalized intersections in the MassDOT District Five region was 0.58/MEV as of January 2013.

### All-Way Stop Control and Traffic Signal Warrant Analyses

Conditions at the intersection were tested to determine if warrants for an All-Way Stop Control (stop signs on all approaches) and/or the installation of traffic signals were satisfied for this location. All-Way Stop Control and Traffic Signal Warrants are sets of minimum criteria defined by the Federal Highway Administration in their Manual on Uniform Traffic Control Devices (MUTCD) that define the need for, or appropriateness, of these traffic control devices.

***Existing conditions at Hall's Corner do not satisfy any of the warrants for an All-Way Stop Control or Traffic Signal application.***

## **7.3 Pedestrian Connectivity and Bicycle Accommodations**

Hall's Corner currently has limited pedestrian accessibility. On roadways where a sidewalk is present, generally it is only on one side of the roadway. At the five-way intersection, only Washington Street and Bay Road have crosswalks, making maneuvering around Hall's Corner on foot challenging. The location of parallel and perpendicular on-street parking at the intersection presents an obstacle to pedestrians. There are also substantial obstacles to accessibility and mobility for physically challenged individuals, with crosswalks that do not include curb ramps or truncated domes, and brick sidewalks that can be difficult for those with disabilities to maneuver.

An off-road walking path connects the Duxbury Housing Authority development on Chestnut Street to the rear of Foodie's Market plaza. The walking path connects to other walkways on the housing development side, while on the plaza side it terminates in a parking area, and does not include further connections to the plaza or street.

Bicycle parking racks are available on Standish Street. None of the roadways serving Hall's Corner currently have bike lanes or painted shared-lane markings, or "sharrows"; however, Bay Road has adequate shoulder space to accommodate bicyclists and has posted "Share the Road" signage alerting drivers to the presence of bicyclists.

## **7.4 Transit**

The Greater Attleboro Taunton Regional Transit Authority (GATRA) currently provides fixed route and paratransit services to Hall's Corner along with other areas of Duxbury through its Seaside Area Inter-Link (SAIL) line. The SAIL line serves destinations in Kingston, Duxbury, Marshfield, and Pembroke. It provides connections to regional transportation, including other GATRA routes in Plymouth as well as

connections to the Plymouth and Brockton Street Railway Company (P&B) facility in Kingston and the MBTA Commuter Rail Station in Kingston.

GATRA serves Hall's Corner via Chestnut Street and Depot Street, with a dedicated stop in front of Foodie's Market and the Post Office. Since GATRA is a "flag stop" service, customers can board a GATRA bus anywhere along the route by flagging down the driver (or similarly requesting a stop for alighting if on-board) as long as it is safe for the driver to stop.

## 8.0 PARKING UTILIZATION AND TURNOVER ANALYSIS

### 8.1 Study Area

The geographic scope of the parking utilization and turnover study included the parcels directly abutting the Hall's Corner intersection as well as numerous commercial parcels on Bay Road, Chestnut Street, Depot Street, Standish Street, and Washington Street. Figure C displays the parking study area included in the parking utilization and turnover study.

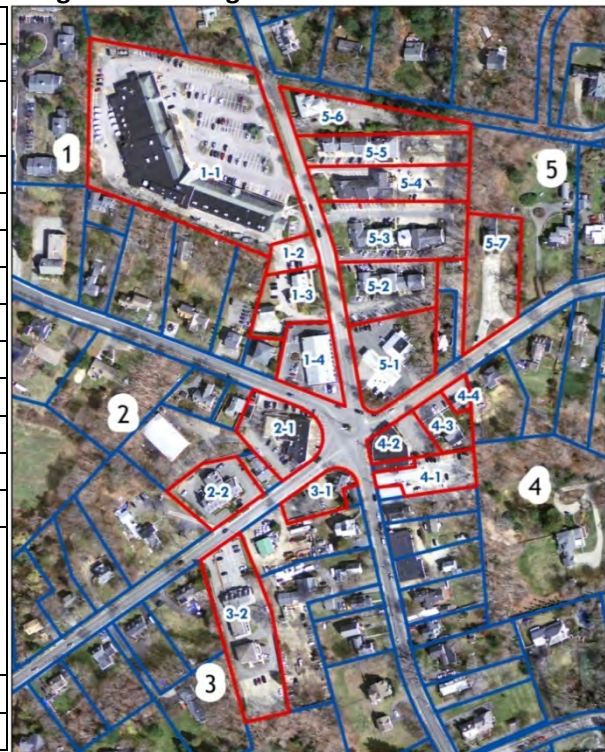

Characteristics of the study area included:

- A mix of commercial uses (eatery, supermarket, convenience store, office, other service);
- A mix of small and large parking areas;
- A mix of low and high turnover areas (office/service vs. eatery/convenience);
- A mix of on-street and off-street parking, and;
- A mix of formal and informal parking.

**Table 15: Parcel Reference Table**

Parcel	Description
1-1	Foodies Market, Rite Aid, etc.
1-2	Vantage Point, Campbell/Smith Architects
1-3	
1-4	VERC, Dunkin Donuts
2-1	Hall's Corner Store, Wildflower Café, etc.
2-2	Duxbury Dental, Lougee Insurance Agency
3-1	Duxbury Mortgage, Simply Eyewear
3-2	Rockland Trust
4-1	Duxbury Pizza
4-2	Duxbury Wine & Spirits
4-3	Maine Pointe LLC
4-4	London Looks
5-1	Gulf Gas Station
5-2	Duxbury Marketplace
5-3	
5-4	
5-5	
5-6	Duxbury Cleaners & Tailors
5-7	Duxbury Recreation Department

**Figure C: Parking Utilization & Turnover Area**

This combination of characteristics results in an array of patron and employee habits in the study area. Examples of this include the different parking utilization and turnover rates of business such as the Foodies Marketplace, Duxbury Pizza, and the Gulf Gas Station. Clearly, folks patronizing and working at those establishments are doing so for different reasons and stay for different periods, resulting in different utilization and turnover rates. For example, a customer shopping at a supermarket is typically going to stay for longer period of time than that of a customer purchasing products at a convenience store resulting in a shorter duration and higher turnover rate.

## 8.2 Study Methodology

The parking utilization and turnover analysis done for this project was completed utilizing standard practices in the *Manual of Transportation Engineering Studies, 2<sup>nd</sup> Edition*, published by the Institute of Traffic Engineers (ITE). The parking analysis included a focus on parking utilization and parking turnover during both the Spring and Summer of 2014. The study involved recording the license plate of the vehicle occupying each parking space every hour in order to determine lot utilization and turnover. The surveys were conducted from 7:00 AM to 6:00 PM (11 hours) on Wednesday – May 21, 2014 and Tuesday – July 8, 2014.

By recording the license plate numbers, an average duration and the average number of vehicles per space can be calculated. Calculation of these averages aids in determining whether vehicles in the study area are creating parking issues by violating the posted time limits. Together, the parking studies are intended to help determine what, if any, parking issues exist and how to begin resolving them. They aid in establishing peak parking demand, distribution of parking throughout the day, and parking duration.

## 8.3 Parking Inventory

### On-Street and Off-Street Parking

The Hall's Corner study area was subdivided by parcels (25 in total) for preparation of the parking utilization and turnover counts. Each parcel was inventoried to determine the number of formal and informal on-street as well as off-street parking spaces. Table 15 illustrates the total parking supply in the study area and Table 16 highlights the on-street spaces in the study area.

**Table 15: Hall's Corner Parking Supply**

On-Street Spaces	Off-Street Spaces	Total Spaces
55	560	615

**Table 16: Hall's Corner On-Street Parking Supply**

Parcel	Formal Spaces	Informal Spaces	Total Spaces
1-4	5	5	10
2-1	23	0	23
3-1	2	0	2
4-1	15	0	15
4-2	5	0	5
Total	50	5	55

For the most part, the parcels which provided on-street parking spaces in the study area (generally businesses abutting the intersection) did so with formal painted spaces. The one exception was Parcel 1-4 (VERC Car Rental and Dunkin Donuts) which had an area of pavement on the west side of Depot Street where vehicles routinely parked to frequent those businesses. That area was noted as an informal parking area and was added to the total on-street parking supply. It should be noted that the on-street parallel parking on Standish Street was included in Parcel 4-1 in order to be consistent with the rest of the study area. The following section provides a description of the formal and informal parking supply and how it was calculated for the study area.

### Traffic Circle Parking (On-Street)

The on-street parking supply located on the Hall's Corner traffic circle consists of a mix of conventional perpendicular, angle, and parallel. The majority of the parking spaces are the perpendicular type followed by angle and parallel respectively. The parallel parking spaces typically do not pose a safety concern for Hall's Corner as they seldom require vehicles to back into the open spot; however, the angle and perpendicular spaces pose a serious safety threat to passing vehicles, bicyclists, and pedestrians due to the "back-out" vehicle departure.

### Formal and Informal Parking Spaces

Several parcels in the study area had a mix of formal painted parking spaces and areas without formal painted spaces where patrons were regularly parked. As such, using the 9'x18.5' parking space dimension found in Section 603.5 of the Duxbury Zoning Bylaw, an approximate number of informal spaces was estimated for each parcel with this characteristic. Examples of this condition were found at Parcel 3-1 which had a sizable gravel lot located behind the Simply Eyewear and Duxbury Mortgage Services businesses abutting the Hall's Corner intersection that had no formal painted spaces and at Parcels 5-4 and 5-5 (Duxbury Marketplace) which had a mix of formal spaces closest to the street and a collection of informal spaces in the rear. In order to analyze the parking utilization for the study area a parking supply needed to be approximated for parcels such as those. Table 17 shows the total number of formal and informal study area off-street parking spaces.

**Table 17: Hall's Corner Off-Street Parking Supply**

Parcel	Formal Spaces	Informal Spaces	Total Spaces
1-1	159	20	179
1-2	9	0	9
1-3	3	6	9
1-4	11	3	14
2-1	2	9	11
2-2	31	0	31
3-1	0	17	17
3-2	20	7	27
4-1	32	0	32
4-2	0	14	14
4-3	6	0	6
4-4	0	4	4
5-1	22	0	22
5-2	37	0	37
5-3	28	17	45
5-4	9	28	37
5-5	12	16	28
5-6	23	0	23
5-7	15	0	15
Total	419	141	560

*Example of Formal Parking (Parcel 1-1)*

*Example of Informal Parking (Parcel 3-1)*

Overall, the majority (75%) of the off-street parking supply in the study area consisted of formal painted parking spaces; however, without a formal parking program, people will use more space than necessary for their vehicle and the likelihood of underutilization increases.

## 8.4 Parking Utilization

Table 18 and Figure D summarize the parking utilization during the Spring (May, 2014) count and the Summer (July, 2014) count. More detailed parking utilization tables for each hour and each location are included in the Appendix.

**Table 18: Hall's Corner Spring and Summer Parking Utilization**

Interval	Vehicles Parked		Utilization	
	May	July	May	July
7:00 AM – 8:00 AM	82	69	13.3%	11.2%
8:00 AM – 9:00 AM	157	137	25.5%	22.3%
9:00 AM – 10:00 AM	193	235	31.4%	38.2%
10:00 AM – 11:00 AM	230	298	37.4%	48.5%
11:00 AM – 12:00 PM	267	327	43.4%	53.2%
12:00 AM – 1:00 PM	271	363	44.1%	59.0%
1:00 AM – 2:00 PM	319	328	51.9%	53.3%
2:00 AM – 3:00 PM	301	300	48.9%	48.8%
3:00 AM – 4:00 PM	296	267	48.1%	43.4%
4:00 AM – 5:00 PM	236	232	38.4%	37.7%
5:00 AM – 6:00 PM	197	175	32.0%	28.5%
Total	2,549	2,731	37.7%	40.4%

According to the surveys done in the Spring and Summer of 2014, there is currently ample parking supply in Hall's Corner to meet the weekday demand. Overall, parking during the weekday peak hour is approximately 45%-55% percent utilized, which from a broad perspective, is below desirable peak efficiency. Parking demand generally peaked between 11:00 AM – 2:00 PM in May and July. Generally, eateries and convenience stores have spikes in demand during the lunch period and Hall's Corner has several of each (Foodies, Duxbury Pizza, D'Orazio's, Tsang's Café, Halls Corner Store, Gulf Gas Station).

**Figure D: Hall's Corner May and July 2014 Parking Utilization**

## 8.5 Parking Turnover

In addition to counting the number of vehicles simply parked each hour, additional detail was documented at key on-street and off-street locations to understand parking turnover (how frequently spaces are used over the course of the survey period and for how long). In order to collect these characteristics, license plate data was collected to track a parked vehicle's continued presence in each hourly circuit.

The following metrics shape the idea of how long a vehicle stays at a particular location:

**Duration (Hrs.):** this metric illustrates how long a particular vehicle stayed at a particular parking lot

**Turnover Rate:** this ratio shows the number of different vehicles parked per space

Table 19 summarizes the measured May and July duration and turnover rates for each parcel in the study area.

**Table 19: Hall's Corner Parking Duration and Turnover Rates**

Parcel	Duration (Hrs.)	
	May	July
1-1A	1.9	1.8
1-1B	4.5	4.1
1-2	4.0	5.0
1-3	4.3	6.2
1-4	3.3	3.7
1-4S	1.9	1.5
2-1	2.2	3.0
2-1S	1.5	1.5
2-2	2.8	3.3
3-1	3.0	3.2
3-1S	1.0	2.2
3-2	1.9	2.4
4-1	1.8	1.8
4-1S	1.2	1.1
4-2	2.5	2.1
4-2S	1.0	1.0
4-3	3.4	3.1
4-4	2.5	2.7
5-1	1.7	2.2
5-2	2.1	2.9
5-3	2.1	2.0
5-4	2.4	2.1
5-5	2.4	2.3
5-6	2.4	3.0
5-7	2.3	2.5
Average	2.4	2.7

Parcel	Turnover Rate	
	May	July
1-1A	2.2	2.6
1-1B	0.8	0.8
1-2	1.1	0.7
1-3	1.1	1.1
1-4	1.9	1.3
1-4S	1.2	1.4
2-1	2.5	1.8
2-1S	2.3	2.0
2-2	2.2	1.5
3-1	1.5	1.8
3-1S	0.5	2.5
3-2	1.9	1.8
4-1	2.3	2.2
4-1S	1.2	1.9
4-2	0.6	1.2
4-2S	1.0	4.6
4-3	1.2	2.5
4-4	3.5	2.8
5-1	2.7	2.5
5-2	1.4	1.4
5-3	1.1	1.4
5-4	0.9	1.3
5-5	1.4	1.6
5-6	0.8	0.3
5-7	1.4	0.8
Average	1.5	1.8

It was clear during the surveys that Parcel 1-1 (Foodies) needed to be split into two distinct areas to differentiate between employee and customer parking. The majority of the vehicles parking in the rear of the building were doing so for the entire survey period which indicated they were either business owners or employees. In addition, Parcels 1-4 (VERC & Dunkin Donuts), 2-1 (Halls Corner Store and others), 3-1 (Duxbury Mortgage Services and Simply Eyewear), 4-1 (Duxbury Pizza), and 4-2 (Duxbury Wine & Spirits) had on-street parking spaces either in front or adjacent to their businesses and were separated in order to provide a more accurate on-street analysis. Parcels with on-street parking were indicated by adding an “S” for “street parking” to the parcel identifier.

#### Duration

The average parking duration was 2.4 hours per vehicle in May and 2.7 hours per vehicle in July. This pattern is not surprising considering the “beach community” characteristic; the proximity to Duxbury Beach; and the higher traffic volumes in July. The parcels that exceeded the average duration of 2.4 hours in May and the 2.7 hours in July were those that were privately owned primarily low intensity service based businesses (mortgage, doctors’ offices, architects, optical shops). Field observations concluded that there were vehicles parked for extended periods in certain lots; therefore, any vehicle parked for more than five hours were assumed to be business owners and/or employees. On the contrary, those parcels which had a low duration in May and July were those that directly abutted Hall’s Corner; had on-street parking; and, were generally high intensity service based businesses (Gulf gas station, Dunkin Donuts, Halls Corner Store, Duxbury Pizza, and Duxbury Wine & Spirits).

Generally, an average two-hour duration is appropriate for downtown type visitors to do some shopping and grab lunch; however, the lack of posted time restrictions allow visitors to feel comfortable taking their time enjoying the area without worrying about potentially getting a parking violation. The on-street parking on Standish Street (Parcels 4-1 and 4-2) was the only area that had a posted 1-hour time limit and according to Table 20, that time limit was generally observed as average duration was approximately 1 hour.

#### Turnover Rate

The average parking turnover rate was 1.5 vehicles per space in May and 1.8 vehicles per space in July which coincides with the higher traffic volumes recorded in July. The parcels that exceeded the average turnover rate of 1.5 vehicles in May and the 1.8 vehicles in July were those that were primarily high intensity service based businesses with a higher number of parking spaces. Parcel 1-1A (Foodies front lot), parcel 2-1S (Halls Corner Store on-street parking), parcel 5-1 (Gulf gas station), and parcel 4-1 (Duxbury Pizza) exceeded the average turnover rates in both May and July. The angled on-street parking on Standish Street (parcel 4-2) had the highest recorded parking turnover rate with 4.6 vehicles per space in July. Those parcels which had a lower than average turnover rate in May and July were those that also had longer duration times. Parcels such as 1-1B, 1-2 and 1-3 (Foodies back lot, Vantage Point Realty Advisors, Campbell/Smith Architects); parcel 3-1 (Duxbury Mortgage Services and Simply Eyewear); and, parcel 3-2 (Rockland Trust) had turnover rates between 0.7 and 1.8.

Overall, the average parking turnover rates in both May and July showed the difference in the commercial uses in Hall’s Corner. The on-street parking seemed to turnover faster than the off-street; however, there are clear safety concerns as the majority of the on-street parking is located on the traffic circle and is the conventional back out type. Patrons leaving their parking space in front of Parcel 1-4 (VERC and Dunkin Donuts), Parcel 2-1 (Halls Corner Store and others), and Parcel 4-2 (Duxbury Wine & Spirits) generally backed out into traffic which created congestion and safety issues.

## 9.0 CONCLUSIONS AND RECOMMENDATIONS

This analysis has found that while Hall's Corner faces some challenges – including a disjointed retail shopping area, a limited business mix, a sometimes confusing traffic circle, and a lack of pedestrian amenities – it does have a strong asset base. These recommendations are aimed at increasing the intensity of economic activity, improving the flow of traffic, enhancing pedestrian and bicyclist safety, and ensuring the presence of adequate parking facilities in Hall's Corner.

When either rebuilding or reinvigorating a neighborhood retail center, the Urban Land Institute's *Ten Principles for Rebuilding Neighborhood Retail* should be taken under advisement. These principles include:

- Great Streets Need Great Champions
- It Takes a Vision
- Think Residential
- Honor the Pedestrian
- Parking is Power
- Merchandise and Lease Proactively
- Make It Happen
- Be Clean, Safe, and Friendly
- Extend Day into Night
- Manage for Change

The recommendations in this report touch upon many of these principles, which are applicable to both urban and suburban neighborhood retail centers, where retailing is struggling to recover from the shift of buying habits that led people to malls and shopping centers rather than to downtowns and neighborhood retail centers.

### 9.1 Market Analysis Recommendations

At the heart of Hall's Corner success is its ability to offer businesses, residents and visitors a unique and welcoming environment. Recommendations drawn from the market analysis include strategies that address business development and recruitment, market identification/branding, marketing/promotion, and appearance improvement.

#### Business Development & Recruitment

The successful development and recruitment of business within Hall's Corner is needed to develop critical mass and increase economic activity in the area. There are currently 86 businesses located within Hall's Corner, which is below the number generally expected to draw from a broad regional market. Of the 86 businesses in Hall's Corner, there are only approximately 20 retail stores and nine dining establishments. Specialty shopping locations like malls and lifestyle centers can contain more than 75 stores and restaurants. While Hall's Corner is not going to compete "head to head" with area malls and shopping centers, there is capacity within the area to support additional businesses, as the Five Minute Drive Time Area is leaking more than \$84 million annually. When locating additional businesses in Hall's Corner it is important to remember that they should complement/have synergy with the existing businesses in the area. The results of the Customer Survey and Business Survey, interviews, and market analysis suggest that the following types of businesses would be most viable, compatible, and appropriate for Hall's Corner:

### *Upscale Full-Service Restaurants*

Full-Service Restaurants consist of establishments engaged in providing food services to patrons who order and are served while seated (i.e., waiter/waitress service) and pay after eating. The Sales Leakage analysis shows that there is an opportunity for additional full-service restaurants within the 5, 10, and 15 Minute Drive Time Areas, with the highest percentage of sales leakage occurring within the 5 and 10 Minute Drive Time Areas, with more than \$3.2 and \$15.2 million leaking respectively. The need for additional dining establishments in Hall's Corner was reinforced by information obtained from the Customer Survey which asked respondents what types of additional services and businesses they would like to see in Hall's Corner, of which full-service or sit down restaurants was the most requested by 64.8% of respondents. There is an opportunity to capture some of these sales through the presence of upscale full-service restaurants that would cater to the preferences of the local population. The placement of full-service restaurants is an important category for Hall's Corner as it will add foot traffic and continue to drive locals and visitors to the area.

### *Hardware/Garden Store*

The Building Material, Garden Equipment & Supply Store category shows there is \$3.9 million in leakage in the 5 Minute Drive Time Area, but a surplus of sales in both the 10 and 15 Minute Drive Time Areas. This surplus can be attributed to the location of big-box home improvements stores in nearby Kingston and Pembroke (Lowe's) and Plymouth (Home Depot). While these stores have a large variety of items, the knowledgeable and personal service which was noted as being very important to the respondents of the Customer Survey in Duxbury is sometimes absent. The Customer Survey showed that a hardware/garden store was the second most popular requested business with 46.8% of respondents indicating they would like to see one of these types of stores in Hall's Corner. While large home improvement stores, such as Home Depot or Lowe's would not be feasible or appropriate for Hall's Corner, there are indications of market support for a smaller, traditional type of hardware store that carries a variety of items for the homeowner and focuses on personal service. Examples of compatible hardware stores for Hall's Corner may include an independently owned and operated Ace Hardware, True Value Hardware or Do It Best.

### *High-End Clothing/Accessory Stores*

As is the case in other small suburban communities, clothing sales tend to leak to nearby communities where malls and shopping centers offer a variety of clothing styles at a number of different price points to satisfy most consumers. The Clothing and Accessory category shows that there is leakage occurring in the 5, 10, and 15 Minute Drive Time Areas, again with the highest percentage of sales leakage occurring within the 5 Minute Drive Time Area, with more than \$4.7 million leaking from this area annually due to insufficient retail offerings in this category. The need for additional clothing and accessories establishments was again reinforced by information obtained from the Customer Survey in which 33.6% of respondents indicated that they would like to see additional clothing and accessories establishments in Hall's Corner, the fourth most requested type of business. There is an opportunity to capture some of these sales through the presence of small, high-end boutique clothing stores that would cater to the preferences of the local population.

### *Limited-Service Restaurants*

Limited-Service Restaurants consist of establishments engaged in providing food services (except snack and nonalcoholic beverage bars) where patrons generally order or select items and pay before eating. These types of restaurants include a wide variety of eateries, including delis and sandwich shops, cafes, pizza parlors and fast-food restaurants. The Sales Leakage analysis shows that there is an opportunity for additional limited-service restaurants within the 5, 10, and 15 Minute Drive Time Areas, with the highest

percentage of sales leakage occurring within the 5 Minute Drive Time Area, with more than \$3.6 leaking annually. The need for additional dining establishments in Hall's Corner was reinforced by information obtained from the Hall's Corner Customer Survey which asked respondents what types of additional services and businesses they would like to see in Hall's Corner, of which a café/bakery was the third most requested by 45.1% of respondents and other limited-service or take-out restaurants was the most the fifth most requested by 29.5% of respondents. The placement of additional limited-service restaurants will continue to add foot traffic and drive locals and visitors to the area.

#### *Develop Business Recruitment Materials*

The community should develop attractive recruitment and marketing materials to present to interested prospects. The materials should be posted online as well as distributed to potential retailers. The recruitment materials should be designed to show interested prospects why they should consider locating to Hall's Corner. Contents should include the following information:

- Maps showing the location of Duxbury and Hall's Corner, the trade areas, proximity of neighboring attractions, neighboring communities, etc.
- A list of businesses currently located in Hall's Corner.
- The types of businesses that town would like to attract, based on opportunities identified.
- A listing of available commercial properties that is updated regularly and contains contact information for brokers and realtors.
- Trade area demographic characteristics and other market data from this study.
- Traffic counts for local roadways.
- Information about positive news or trends in the area, such as public and private investments, business successes and special events.
- Contact information for Town officials (Town Planner and Economic Advisory Committee), the Duxbury Business Association, the Plymouth Chamber of Commerce, and South Shore Chamber of Commerce.

#### Market Identification/Branding

The community should consider developing a unique identification or a brand for Hall's Corner as a way to stand out among competing business districts and shopping centers. It should project a positive attitude and approach and be seen as a place where people would want to spend time. Market identification or branding can also create a sense of community and make it more attractive for both residents and visitors. Market identification or branding can also have a number of positive impacts including increasing exposure for existing businesses, as well as being used as a recruitment tool for prospective businesses.

Creating an identity or a brand is far more than just putting a logo or a tagline on a product, it is the foundation of a marketing approach to an area and can be an integral part of a business strategy. If it is to be successfully conceived, implemented and sustained it is recommended that the community partner with a professional communications and marketing firm to explore and identify specific market and branding strategies.

Once an identity or a brand is developed it should be shared and used by all local merchants, business associations, and tourism and economic development agencies to increase the identity or brand's awareness and should be disseminated not only in advertising and materials, but also via streetscape design elements, including street banners, informational kiosks, and wayfinding signage.

While it is beyond the scope of this project to suggest an identification or brand for Hall's Corner, a question was asked in the Customer Survey as to what identity or image would you like to see Hall's Corner develop for itself as a unique business and shopping district. The most commonly mentioned identity or image respondents indicated was that of a quaint, traditional New England coastal village, with frequently mentioned comparisons of Downtown Hingham and Scituate Harbor. Coincidentally, both Downtown Hingham and Scituate Harbor have already taken steps in identifying or branding themselves. Downtown Hingham promotes itself as having the charms of a quintessential New England town center and the joys of unusual shops, excellent dining, casual entertainment and a warm welcome, whereas Scituate Harbor promotes itself as the "Heart" of Scituate with shopping, dining, entertainment, services, fishing and boating. Both Downtown Hingham and Scituate Harbor have created websites and Facebook pages to advertise and promote their respective areas. Information about Downtown Hingham can be found at <http://www.discoverhingham.com/> as well as at <https://www.facebook.com/DowntownHingham> and information about Scituate Harbor can be found at <http://scituateharbor.server270.com> as well as at <https://www.facebook.com/pages/Scituate-Harbor-Business-Association/179687063826>

As part of this study, OCPC surveyed the downtowns of three other communities in Massachusetts that were considered successful downtowns by study participants: Downtown Concord, Downtown Hingham and Downtown Osterville. Upon further analysis, the following similarities were identified:

- More than 50% of the businesses in the area were either retail shops and/or restaurants.
- The vast majority of businesses were small, independently owned businesses.
- Sidewalks were present throughout each of the areas and were present on both sides of the street(s).
- Parking lots were located in the rear of businesses.
- On street-parking was almost exclusively parallel.
- Streetscape elements in the form of ornamental streetlights and ornamental trash and recycling receptacles were present in the Downtowns of Concord and Hingham.

#### Marketing & Promotion

Marketing and promotion of the area is recommended to help raise the local and regional exposure of Hall's Corner and should focus on the area's strengths, such as the caliber of local/independent stores and personalized service that sets the area apart. According to the Sales Leakage Analysis, the local market area, in particular the 5 Minute Drive Time Area, has plenty of untapped market potential, as approximately \$84 million leaks from this area annually.

#### *Expand Store Hours*

Many of the businesses located in Hall's Corner have limited hours of operation, as many retail shops close by 6:00 PM on weekdays as well as on Sunday. These limited hours were found to be the second biggest disadvantage by respondents participating in the Customer Survey, with 42.9% of respondents stating so. Not being open after 6:00 PM during the weekday limits the number of rush-hour commuters who are able to shop in Hall's Corner, as many of these workers do not arrive in Duxbury until after 6:00 PM. The lack of evening hours among so many of the businesses in the area may dissuade consumers from shopping at other businesses in Hall's Corner that are open after 6:00 PM and force customers to shop in nearby Kingston and Plymouth, most of which are open later into the evening. The number of stores closed on Sunday may also hamper tourism in the area, as there are a limited number of places for tourists to shop and stroll while visiting area attractions.

The town may want to meet with businesses and encourage them to open later in the morning and operate into the early evening, allowing more customers access to businesses and services in Hall's Corner. This does not necessarily mean that businesses in Hall's Corner would need to stay open more hours; rather it may simply mean shifting store hours from ten-to-six, to say, eleven-to-seven. As an introduction to possibly shifting hours in the area the town may want to encourage businesses to create a "Fridays After Five" event. Nearby Scituate hosts its own "Friday After Five" event on the first Friday night of every month, when businesses stay open late and host music, authors, artists, and special events as a way to further promote businesses in the area.

#### *Create Additional Special Events*

One of the best ways to change the perception of both residents and locals about Hall's Corner is to give them reasons to visit the area. One of the best ways to do this is to create events in the area. An example of a successful event that does this on an annual basis is Duxbury's Holly Days. The annual event held every November brings individuals and families to Hall's Corner by offering a wide variety of activities as well as a number of sales and promotions from local merchants who are showcasing their wares during the holiday shopping season. Events like Holly Days add excitement and vibrancy to the area and are more likely to attract residents from outside of Duxbury.

Consideration should be given to developing additional events to attract people to Hall's Corner at other times of the year. Efforts should focus on a limited number of high-quality events that build on local and regional assets. For maximum exposure, it may be wise to schedule Hall's Corner events to coincide with and complement other activities planned in Town. During the creation of future events it is imperative that all businesses in Hall's Corner be contacted and invited to establish sales and promotions for the events. Sales and promotions attract more people, especially if promoted and advertised in advance.

#### *Establish a Web Presence*

The establishment of a dedicated shopping and dining web page for Hall's Corner is a very cost-effective and informative way to promote the shops, restaurants and services available in Hall's Corner to prospective customers. For the site to be successful it needs to contain relevant content and be updated regularly. Information to consider placing on the website includes:

- Listing of Businesses
- Listing of Nearby Attractions
- Listing of Area Events
- Listing of Special Offers and Sales
- Listing of Properties for Sale/Lease/Rent
- Images of the Area
- Stories about Existing Businesses and the People who own them
- Positive Reviews and Comments from sites such as Yelp and TripAdvisor

The site should also include a place where current businesses could place their individual weblinks, thereby creating one central site. The site should also feature an area where guests can sign up to receive informational emails and newsletters.

As was previously mentioned the downtown areas of nearby Hingham and Scituate each have their own websites and Facebook pages that assist in the marketing and promotion of these areas. Duxbury may do the same with Hall's Corner in establishing its own website and Facebook page. Examples of potential website names include [www.HallsCorner.com](http://www.HallsCorner.com), [www.VisitHallsCorner.com](http://www.VisitHallsCorner.com), or

[www.DiscoverHallsCorner.com](http://www.DiscoverHallsCorner.com). The site should be included in any and all Hall's Corner marketing materials as well as be linked to the Town's webpage for maximum exposure.

#### *Develop a Merchant Guide/Brochure*

The creation of a merchant guide/brochure in print form is another way businesses in Hall's Corner can reach new audiences. A merchant guide/brochure should include a directory of shops and dining establishments, your brand (if applicable), website address (if applicable), images of the area, a location map, as well as a brief description of other amenities and attractions in the immediate area. These guides/brochures can be disseminated utilizing existing distribution channels such as tourism visitor centers, community and business organizations, as well as area businesses. While a guide/brochure may be costly to produce and distribute and may need to be updated occasionally, some of the costs may be offset with advertising featuring local merchants.

#### *Cooperative Advertising*

The merchants of Hall's Corner could get a better distribution of their advertising dollar using cooperative advertising. In particular, periodic advertising in South Shore Living Magazine, Yankee Magazine, and the Plymouth County Development Council's Dining, Shopping & Activities Guide would be an effective initial effort.

#### Appearance Improvement

A lack of cohesion in Hall's Corner between the three areas (Foodie's Plaza, the Marketplace, and the Traffic Circle) was cited as one of the impediments in Hall's Corner. Improving the appearance of Hall's Corner is crucial in building that sought after cohesiveness. Improving the appearance of the area is also a way to attract new business and stimulate economic development.

#### *Incorporation of Streetscape Elements*

The incorporation of streetscape elements into Hall's Corner will assist in creating a more attractive and cohesive area. Streetscape elements refer to those functional and aesthetic items in pedestrian spaces that provide a more convenient, safe and visually attractive space for pedestrians and other street users. Examples of streetscape elements include period/historic light fixtures, trees and plants, sidewalks, and street furniture (benches, trash receptacles, bicycle racks, bollards). The inclusion of streetscape elements into Hall's Corner will assist in identifying the area as a special and distinct place for shoppers, visitors and employees. Additionally, downtown retailers are known to perform best when there is cohesiveness in an area, which the incorporation of streetscape elements helps provide, with the goal to make these three areas be perceived as one shopping area, not three exclusive choices.

Figure E: Streetscape in Lexington, Massachusetts

### *Update Wayfinding Signage*

Duxbury currently has some wayfinding signage throughout town, but it is intermittent and can be hard to see while travelling in an automobile. Updating the wayfinding signage in concert with development of an identity or brand for the area will help further promote the identity or brand the town is trying to convey. The best wayfinding signage features consistent and recognizable lettering and graphics ensuring that the signage appears neither fragmented nor piecemeal. Wayfinding signage can enhance both visitors' and residents' ability to navigate around town and find desired locations, including parking.

### *Undergrounding of Utility Wires*

The undergrounding of utility wires will help improve the character of the area by reducing visual clutter in the area. With the absence of overhead utilities, communities can more readily undertake improvement projects such as sidewalk widening, tree planting, etc.

### *Development of a Façade Improvement Program*

The development of a Façade Improvement Program will assist business owners and tenants improve the appearance of their façades and street-facing exteriors. A Façade Improvement Program may be funded via a loan program, a grant program, a matching program, or some combination thereof. Specific elements of a Façade Improvement Program may include painting of exterior elements, replacement of street-facing doors, installation of new awnings and the installation of new exterior lighting. Improving building facades will help make the area more cohesive and a more inviting and interesting place to walk and shop. It will also help building owners attract and retain tenants as well as help promote the marketability of the area.

### Other Recommendations

#### *Examine the Possibility of Preserving Ground Floor Space for Retail Uses Only*

Realizing that there is very limited opportunity for the expansion of retail space in Hall's Corner due to the area being surrounded by residences, it is recommended that the Town examine the possibility of preserving ground floor retail space in Hall's Corner by limiting office and financial uses to above ground levels only. By preserving ground floor space for retail only, it will generate more foot traffic for the area, thereby benefitting all businesses in Hall's Corner. This may be done via changes to the existing zoning or via the creation of an overlay district. Hingham has already approved an ordinance for Downtown Hingham that preserves ground floor space for retail uses only.

#### *Investigate the Possibility of Expanding Sewage Capacity*

Hall's Corner, like most of Duxbury, relies on private wastewater treatment systems to handle sewerage. While this form of sewage treatment is currently acceptable for Hall's Corner, the town should investigate the feasibility of constructing a larger package wastewater treatment plant that could process thousands of gallons of sewerage daily. The size of the system would be dependent on the number of businesses utilizing the system and their particular uses.

## **9.2 Transportation and Safety Recommendations and Potential Countermeasures**

As part of creating a welcoming environment to businesses, residents and visitors to Hall's Corner is the need to address transportation and safety concerns in Hall's Corner. While the analysis does conclude that the current design of the neighborhood traffic circle operates efficiently, concerns remain about the traffic circles elevated crash rate as well as the safety of bicyclists and pedestrians in Hall's Corner. A

series of recommendations and strategies address the need to create more effective and safer operating conditions for motorists, bicyclists and pedestrians in Hall's Corner.

#### Traffic Circle Parking Considerations

There are several parking spots within Hall's Corner that directly interfere with the operation of the intersection and present a safety hazard to motorists. The removal of the following parking spaces should be considered:

- Removal of perpendicular parking in front of VERC / Dunkin Donuts of Chestnut Street
- Removal of perpendicular parking between Chestnut Street and Bay Road
- Removal of diagonal parking beyond the Stop Sign on Standish Street
- Removal of parallel parking between Bay Road and Standish Street; and between Standish Street and Washington Street

#### Complete Streets

The Town should consider the adoption of a Complete Streets policy into its zoning bylaw for the roadways that serve Hall's Corner. Complete Streets is a planning and design concept that ensures all roadway users are included in the design, construction, and maintenance of roadways.

**Motorists:** Travel lanes should have adequate width to accommodate all motor vehicles (passenger cars, trucks, buses, emergency vehicles), however be narrow enough to reduce travel speeds and provide additional space on the sides for the placement of shoulders and sidewalks. Typically ten feet is a width adequate for providing mobility for motorists while also effective at controlling travel speeds.

**Bicyclists:** A minimum 4' (ideally 5') wide shoulder or painted bike lane should be provided to safely accommodate bicyclists. When adequate shoulder space is not available, painted shared-use arrows ("sharrows") may be painted on the right-hand side of the travel lane to alert motorists that bicyclists are using the travel lane.

**Pedestrians:** Sidewalks should be included along both sides of the roadway, or at a minimum one-side of the roadway when the right-of-way is not available or the cost of attaining the right-of-way is prohibitive. Accessible ramps should be included at all crossing locations, and the surface of the sidewalk should be adequate for all potential users.

**Transit:** Transit routes should be marked, so visitors and residents are aware that transit options are available. Bus shelters should be placed along the route, particularly at significant boarding and alighting points.

**Parking:** On-street parking should be designed as parallel parking, or reverse-in only diagonal parking. Front-in diagonal parking presents a significant hazard, particularly to bicyclists, as drivers reverse out of them into the travel lanes.

#### Speed Humps

Speed Humps are an option available for traffic calming in Hall's Corner, particularly for controlling speed as vehicles approach the business district and intersection. A speed hump, also sometimes called a speed table, is much longer than a "speed bump", and is effective at reducing travel speeds while minimizing impacts on area noise, emergency vehicle operations, and snow plow operations. A speed

hump usually has a total length of 22 feet, with 6 foot long ramps rising between 3 to 4.5 inches and a 10 foot long flat top.

### Signage Improvements

Advance warning signage should be consistent on all approaches. Given the nature of the intersection, appropriate advance warning signage on all approaches to the intersection would be sign W2-6 from the Manual on Uniform Traffic Control Devices (MUTCD). Stop signs on Depot Street, Washington Street, Standish Street, and Bay Road should be upgraded with retroreflective surfaces. Efforts should be made to improve visibility of the Stop Sign on the Standish Street approach, including consideration of the removal of the last parking space before the Stop Sign and construction of a curb bump out to bring the Stop Sign closer to the travel lane. The installation of a curb bump out to bring the Stop Sign closer to the travel lane. The installation of a curb bump out along with the installation of a crosswalk would also improve safety for pedestrians crossing at that point.

Figure F: Appropriate advance warning signage for traffic circles

The mid-block crosswalk on Depot Street, adjacent to The Marketplace, should be appropriately signed with appropriate MUTCD compliant signage (sign W11-2 with optional W16-7P placard). Safety for pedestrians at this crosswalk could be further improved with the installation of pedestrian actuated Rectangular Rapid Flash Beacons (RRFB) that alert drivers a crossing pedestrian is present.

The “Keep Right” signage installed on the flag pole island in the center of Hall’s Corner should be updated with signage that includes an arrow pointing right, consistent with the MUTCD (sign R4-7a).

Figure G: Crosswalk signage (sign W11-2 from MUTCD)

Figure H: “Keep Right” signage (sign R4-7a from MUTCD)

### Roundabout

The construction of a typical modern roundabout may be an option for Hall’s Corner. A modern roundabout has a small central island around which traffic circulates. The approaches have splitter islands that create a physical “choke point” that forces drivers to slow down on approach, deflect to the right, and yield to traffic in the roundabout. The approaches are typically controlled by yield signs.

Roundabouts are very effective at processing low to moderate traffic volumes and have a very good safety performance record. Furthermore, roundabouts are typically safer for pedestrians than typical stop controlled intersections due to the splitter islands providing a pedestrian refuge, allowing a pedestrian to only focus on one direction of travel at a time. An engineering evaluation would need to be performed to determine if a modern roundabout is feasible in Hall’s Corner.

Roundabouts are becoming more popular based on the multiple opportunities to improve safety and operational efficiency, and provide other benefits. According to the NCHRP Report 672, *Roundabouts: An Informational Guide*, the following are benefits of roundabout intersections, and some constraining factors:

- *Traffic Safety:* Numerous studies have shown significant safety improvements at intersections converted from conventional forms to roundabouts. The physical shape of roundabouts eliminate crossing conflicts that are present at conventional intersections, thus reducing the total number of potential conflict points and the most severe of those conflict points.
- *Operational Performance:* When operating within their capacity, roundabouts typically have lower overall delay than signalized and all-way stop-controlled intersections. The delay reduction is often most significant during non-peak traffic periods.
- *Environmental Factors:* Roundabouts often provide environmental benefits by reducing vehicle delay and the number and duration of stops compared with signalized or all-way stop-controlled alternatives. This can reduce noise and air quality impacts and fuel consumption significantly by reducing the number of acceleration/deceleration cycles and the time spent idling.
- *Access Management:* Because roundabouts can facilitate U-turns, they can be a key element of a comprehensive access management strategy to reduce or eliminate left-turn movements at driveways between major intersections.
- *Traffic Calming:* Roundabouts can have traffic calming effects on streets by reducing vehicle speeds using geometric design rather than relying solely on traffic control devices.
- *Pedestrian Safety:* Due to the reduction of vehicle speeds in and around the intersection, roundabouts can improve pedestrian crossing opportunities. Additionally, the splitter island refuge area provides the ability for pedestrians to focus on one traffic stream at a time while crossing.
- *Aesthetics:* The central island and splitter islands offer the opportunity to provide attractive entries or centerpieces to communities through use of landscaping, monuments, and art, provided that they are appropriate for the speed environment in which the roundabout is located.
- *Land Use:* Roundabouts can provide a transition area between high-speed rural and low-speed urban environments. They can also be used to demarcate commercial areas from residential areas.
- *Ongoing Operations and Maintenance:* A roundabout typically has lower operating and maintenance costs than a traffic signal due to the lack of technical hardware, signal timing equipment, and electricity needs. Roundabouts also provide substantial cost savings to society due to the reduction in crashes, particularly fatal and injury crashes, over their service life.
- *Approach Roadway Width –* A roundabout may reduce the amount of widening needed on the approach roadways in comparison to alternative intersection forms. While signalized or stop-controlled intersections can require adding lengthy left-turn and/or right-turn lanes, a roundabout may enable maintaining a narrower cross section in advance of the intersection.

#### Pedestrian and Bicycle Improvements

To best maximize the attractiveness of Hall's Corner as a shopping, restaurant, and services destination along with improving safety, improvements should be made to pedestrian and bicycle infrastructure throughout the district and at the intersection. Sidewalks should be located on both sides of each roadway in the Hall's Corner area. Sidewalks should be constructed of a smooth, flat surface, typically concrete or asphalt, to ensure accessibility for all users. Vegetated and/or landscaped buffers between the curb and sidewalk should be included whenever right-of-way permits to provide increased separation between motorists and pedestrians, which increases a pedestrian's comfort level.

Crosswalks should be included at the intersection on all approaches for the safety of pedestrians attempting to traverse the intersection. All crosswalks should include ADA compliant ramps connecting from the crosswalk to the sidewalk. Crosswalks throughout the Hall's Corner area should be the same in

color and design. If solid coloring is to be used for a crosswalk, the paint should include material mixed into the paint to increase friction and reduce the threat of slipping by pedestrians and “spinning out” by bicyclists during wet conditions.

A clear connection through the use of separate walkways and painted crosswalks should be extended from the Housing Authority pedestrian connection in the rear parking lot of the Post Office to the storefront walkway of the plaza, as well as to the sidewalks on Depot Street and the Depot Street crosswalk. Lighting of these walkways should be provided and maintained.

A “raised crosswalk” may be considered for the mid-block crosswalk near the Marketplace on Depot Street. A raised crosswalk is very similar to a speed hump in design, but painted and signed as a crosswalk. It improves safety for pedestrians by increasing visibility of the crosswalk and forcing drivers to slow down on approach. As mentioned underneath “Signage” the installation of Rectangular Rapid Flash Beacons (RRFB) can further increase safety at this location. Shared-lane markings or “sharrows” should be painted on the roadways approaching and departing Hall’s Corner, alerting drivers to the presence of bicyclists.

Bicycle parking should be added at destination points in Hall’s Corner, including Foodie’s Market plaza and the Marketplace.

#### Visibility

Tall vegetation on the central island in Hall’s Corner presents an obstruction to visibility of opposing traffic for motorists. Removal of the taller vegetation should be considered to allow clear sight lines across the intersection from all approaches.

Roadside vegetation, particularly overhanging tree canopies, should be maintained regularly to provide clear sight lines on approaches and reduce the obstruction of roadside signage by vegetation. Additionally, vegetation by Dunkin Donuts should be trimmed or removed to prevent the obstruction of sight lines to and from the Dunkin Donuts driveways.

### **9.3 Parking Conclusions and Recommendations**

Levels of parking utilization and turnover rates are often used to gauge the vitality of a surrounding commercial district. While not having enough parking can stifle a downtown, having too much unused parking can have equally negative impacts. Thus, a successful parking approach strives to balance providing enough parking to support the various businesses over time while also maintaining a district that remains consistent with the historic character; provides a bicycle and pedestrian friendly atmosphere; and, achieves the most desirable and productive use of available land.

#### Conclusions

Upon completing a comprehensive analysis of the parking situation in Hall’s Corner, the following are some general parking conclusions:

- Overall, there is ample parking supply within the study area
- Parking demand currently peaks between 11:00 AM and 2:00 PM
- There is a mix of patrons and employees parking in the study area
- It appeared that several premium on-street parking spaces are occupied by business owners and/or employees and not by patrons
- The on-street parking spaces generally turned over faster than the off-street parking spaces

- The Foodies Market and the Marketplace parking areas had some of the highest turnover in the study area
- The on-street parallel parking spaces on Standish Street appear to be smaller than the typical space which makes it challenging for patrons to park
- The on-street parking (conventional, parallel, and angle) on the intersection is popular but presents a challenge to traffic circulation and bicycle and pedestrian safety
- The angle on-street parking located in front of the stop sign on Standish Street reduces visibility and creates a safety issue for vehicles entering the intersection and for pedestrians crossing the street

### Recommendations

The presence of on-street parking reduces the capacity and flow of roadways, while increasing the potential for collisions (AASHTO, 2004). However, parallel and angle on-street parking can be useful in specific situations with context-sensitive designs by encouraging pedestrian activity, increasing parking supply and traffic calming (ITE, 2009). On-street parking is generally more favorable for low-speed and low-to-moderate-volume roadways provided that it does not conflict with the operation of an intersection.

The following are some parking recommendations that focus on making Hall's Corner safer for all users:

- Eliminate all parking on the traffic circle  
*The parking on the traffic circle creates congestion as vehicles are entering and exiting the parking space and is hazardous to other vehicles and bicyclists.*
- Eliminate the angle parking in front of the stop sign on Standish Street  
*The angle parking in front of the stop sign creates visibility issues for vehicles entering the intersection; increases the chance of a collision with vehicles backing out into traffic; and produces a dangerous situation for pedestrians crossing the street.*
- Enlarge the parking spaces on Standish Street  
*The parking on Standish Street is too small for a large truck or SUV to park safely. As a result, some vehicles occupy more than one spot – reducing capacity. In addition, the spaces do not provide enough clearance for drivers to open their doors.*
- Encourage the land owners to clearly paint formal parking spaces in all of their parking lots  
*Formal painted spaces make it easier for patrons to park as well as reduce the possibility of the parking lot reaching a false capacity.*
- Investigate the possibility of constructing a public parking lot  
*The public parking lot would provide a safe area for patrons and/or employees to park and could serve as a potential wayfinding area.*
- Improve Parking Enforcement Program  
*Numerous vehicles were observed parking on the traffic circle in illegal areas as well as in ways that constricted traffic flow and created hazardous conditions. Without parking enforcement, those conditions will continue and the risk of an accident increases.*

## 10.0 FUNDING SOURCES

Listed below are a number of resources that could be utilized for the implementation of the recommended improvements. Local resources, both in terms of funding and staff time, will push the recommendations forward, but additional outside resources will likely be necessary for completing the improvements. A list of potential funding resources is provided below. Please note that federal aid eligible projects on the Old Colony Transportation Improvement Program (TIP) go through a comprehensive evaluation process to determine priority for funding and the process to fund a project through the TIP may take up to five years. Due to the limitation of TIP funding, communities are encouraged to seek alternate funding avenues for priority projects. OCPC is available to assist the town in its pursuit of the funding sources listed below.

### Economic Development Fund (EDF)

The Economic Development Fund (EDF) finances projects and programs that create and/or retain jobs, improve the local and/or regional tax base, or otherwise enhance the quality of life in the community. EDF gives priority assistance for physical improvements in support of job creation/retention and downtown/commercial center revitalization. Historically, EDF has funded a range of economic and community development projects.

<http://www.mass.gov/hed/community/funding/economic-development-fund-edf.html>

### Massachusetts Downtown Initiative (MDI)

DHCD's Massachusetts Downtown Initiative (MDI) offers a range of services and assistance to communities seeking help on how to revitalize their downtowns. The primary mission of the MDI is to make downtown revitalization an integral part of community development in cities and towns across the Commonwealth. MDI's guiding principles are that the most effective approach to downtown revitalization is a holistic one; that it addresses economic and community development needs; and that it provides a framework of interrelated activities that promote positive change in a downtown to keep it healthy and prosperous.

<http://www.mass.gov/hed/community/funding/massachusetts-downtown-initiative-mdi.html>

### MassWorks Infrastructure Program

The MassWorks Infrastructure Program provides infrastructure grants for work including, but not limited to, sewers, utility extensions, streets, roads, curb-cuts, parking facilities, site preparation and improvements on publicly owned land, demolition, pedestrian walkways, and water treatment systems. The focus of the grant is on economic development, community revitalization, transportation improvements and multifamily housing projects. The Program represents an administrative consolidation of six former grant programs, including:

- Public Works Economic Development (PWED) Grant
- Community Development Action Grant (CDAG)
- Growth District Initiative (GDI) Grant
- Massachusetts Opportunity Relocation and Expansion Program (MORE)
- Small Town Rural Assistance Program (STRAP)
- Transit Oriented Development (TOD) Program

<http://www.mass.gov/hed/economic/eohed/pro/infrastructure/massworks/>

### Business Improvement Districts (BID)

Business Improvement Districts (BID) are special assessment districts in which property owners vote to initiate, manage and finance supplemental services or enhancements above and beyond the baseline of services already provided by their local city or town governments. A special assessment, or common

area fee, is levied only on property within the district. The assessments are collected and expended within the district for a range of services and/or programs, including marketing and public relations, improving the downtown marketplace or city/town center, capital improvements, public safety enhancements, and special events. A BID creates a stable local management structure that provides a sustainable funding source for the revitalization and long-term maintenance of downtowns and city/town centers. The goal of a BID is to improve a specific commercial area by attracting customers, clients, shoppers and other businesses.

<http://www.mass.gov/hed/community/planning/bid.html>

#### Community Development Block Grant (CDBG)

Massachusetts Community Development Block Grant Program is a federally funded, competitive grant program designed to help small cities and towns meet a broad range of community development needs. Eligible CDBG projects include but are not limited to housing rehabilitation or development, micro-enterprise or other business assistance, infrastructure, community/public facilities, public social services, planning, removal of architectural barriers to allow access by persons with disabilities, and downtown or area revitalization.

<http://www.mass.gov/hed/community/funding/community-development-block-grant-cdbg.html>

#### Tax Increment Financing (TIF)

Massachusetts' version of Tax Increment Financing allows municipalities to provide flexible targeted incentives to stimulate job-creating development. Elements of a TIF include:

- Negotiated Agreement between the business and host municipality;
- 5 year minimum, 20 year maximum or anything in between;
- Business pays full tax rate on the “base value”;
- Exemption from property taxation on all or part of the increased value as a result of development (the “increment”);
- Percentage of exemption may range from 5% to 100%;
- Personal property tax exemption for both existing and new property;
- M.G.L. 40 § 59 governs all TIF agreements.

<http://www.mass.gov/hed/business/incentives/tax-increment-financing-tif.html>

#### Local Capital Improvement Program (CIP)

Local Capital Improvement Program (CIP) and local funding have historically been used to provide funding for a number of economic development and transportation related projects.

#### Exactions (Developer Mitigation Agreements)

Communities have increasingly turned to exactions as a means to meet new infrastructure and public service needs. Cities and towns use developer exactions as a strategy to offset the burdens of new development on the community.

#### Public/Private Partnerships

Public/Private Partnerships are agreements between public entities and private parties which are crafted in order to improve or provide services.

#### Chapter 90 Program

Chapter 90 provides funding for highway construction, preservation, and improvement projects that create or extend the life of capital facilities. The Chapter 90 Program is a reimbursable program, as the community must initially pay the cost of a particular project.

#### Transportation Bond Bill (TBB)

The Transportation Bond Bill authorizes and directs MassDOT to expend monies for transportation projects such as reconstruction, resurfacing, rehabilitation or improvements of highways, bridges, and parking facilities. From this, the State will issue either general obligation or special obligation bonds.

#### Congestion Mitigation and Air Quality Improvement Program (CMAQ)

The Congestion Mitigation and Air Quality Improvement Program directs funds toward transportation projects in Clean Air Act non-attainment areas for ozone and carbon monoxide. OCPC is located in the Boston non-attainment area for ozone.

#### Surface Transportation Program (STP)

The Surface Transportation Program (STP) is a block grant type program that may be used for any roads (including NHS) that are not functionally classified as local or rural minor collectors. These roads are collectively referred to as federal-aid eligible roads.

#### National Highway System (NHS)

The National Highway System consists primarily of existing Interstate Highway routes and portions of the Primary System. This program was established to focus federal resources on roads that are the most important to interstate travel, national defense, inter-modal connections, and international commerce.

**APPENDIX 1:      HALL’S CORNER PROJECT REQUEST**

Old Colony Planning Council  
Request for Technical Assistance  
2014 District Local Technical Assistance (DLTA) Program

Part 1: Applicant Information

Lead Community: Town of Duxbury, MA Date: January 30, 2014

Point of Contact, Lead Community, as designated by the governing body (please print):

Name: Thomas A. Broadrick, AICP

Title: Planning Director

Address: Town of Duxbury, 878

Telephone: 781-934-1100 x 5475 Email: broadrick@town.duxbury.ma.us

Partner Communities (if applicable): Please list all partner communities and the contacts and contact information (telephone and email) for each community.

N/A

Part 2: Type of Assistance

Please check the type of assistance requested:

- ☐ Planning Ahead for Housing
- ☒ Planning Ahead for Growth
- ☒ Supporting Regional Services

Part 3: Technical Assistance Proposal

Please include a brief summary of the project below. The summary should address the projects purpose, scope, timeline, desired results and local official/staff commitment to the project.

---

---

---

---

---

**PROJECT OVERVIEW:** The Economic Advisory Committee (EAC) through the Planning Office would like to utilize DLTA Program assistance in the Funding Categories Planning Ahead for Growth/Regional Services to initiate a Development Strategy/Market Analysis of the Town's major development hub known locally as Hall's Corner.

The town of Duxbury is predominately zoned residential with only 80± acres zoned for commercial use. Retail facilities are concentrated in nine neighborhood business districts scattered throughout the town, the largest of which is Hall's Corner. Here three distinct "business areas" make up the district but are disjointed and lack cohesiveness. The local grocery store is located in what can be described as a "strip-mall" development with accompanying post office, drug store, and bank. Across the street is a retail/office "cluster" known as The Marketplace which has four rows of shops situated perpendicular to its road frontage. Finally the "rotary" bringing five (5) town roads together with miscellaneous shops, coffee franchise, and gas station completes the three "business areas".

Through the 1999 Comprehensive Plan and the 2004 Community Development Plan, economic development strategies were explored but on a more town wide basis. The current request is to explore through a market analysis what the existing business demand is and then define what development strategy(s) might work specifically for Hall's Corner. We hope to identify the types of businesses and mixed use development that will be able to be supported by the local and regional populations.

**NEED FOR PROJECT AND LOCAL, REGIONAL AND STATE GOALS ADVANCED BY PROJECT:** As indicated, Hall's Corner is the town's largest business area but is a disjointed combination of three (3) business areas. Shoppers often drive from one area to another even though the distance between them is minimal adding unnecessary traffic to an already busy area. The "rotary" area suffers from a lack of parking, its stores struggle financially and its appearance is relatively unattractive. Local goals would include facilitating growth near town centers by identifying the types of businesses most suitable for

Duxbury and the best locations for such businesses within the zoned neighborhood business district. Regional goals might include Sustainable Growth Patterns and how the new growth will benefit the town center while expanding the regional draw. State goals might include orderly, structured growth patterns using proactive planning efforts.

**SPECIFIC PRODUCTS:**

- A retail market study along with economic strategy report that might lead to changes in zoning bylaws and permitting procedures and targeted development initiatives to implement the findings.
- A basic parking availability study to document the existing on-street and off-street parking in Hall's Corner and the existing use, time and price restrictions, where applicable. A report will include recommendations to more efficiently use existing supply through strategies potentially including streamlined restrictions, restriping, and signage, among others.

- A “Complete Streets” evaluation of Hall’s Corner to recommend infrastructure and streetscape improvements to encourage walking and calm vehicle traffic.

**COMMUNITY INVOLVEMENT:** The EAC would be the lead local committee holding the public meetings with connections to local business groups and the local government. The EAC would report to the Board of Selectmen (BOS) as it is the appointing authority.

**PROJECT TIMELINE:** The project could begin immediately and conclude within six (6) months with milestones determined with a consultant and committee meetings scheduled on a twice a month basis or more frequently if needed in addition to public meetings to be determined.

**MUNICIPAL COMMITMENT:** The BOS appointed EAC is charged with exploring economic development opportunities within the nine (9) Neighborhood Business Districts. Focusing on the largest (Hall’s Corner) will enable the EAC to replicate those efforts in the other business districts. Strong support for this concept is evidenced by the inclusion of a BOS liaison on the EAC and support from the Planning Office through both the elected Planning Board and the Town Manager.

**COMMUNITY CONTRIBUTION:** Presently the nine (9) member EAC meets every other month for two (2) hour meetings resulting in over 100 hours of volunteer service during the year. Adding the Planning Director’s staffing time in scheduling meetings, preparing background information, attending meetings results in over 24 hours of staffing time just for the regularly scheduled meetings. For this particular project staff in-kind hours might approach 50 hours total for a 6-month study with EAC meetings scheduled every 2 weeks if necessary would result in 100 hours of volunteer service.

The Economic Advisory Committee was originally established by the 2004 Annual Town Meeting. It consists of nine members serving staggered three year terms and includes 3 representatives from the business community, three residents at-large, and designees from the Board of Selectmen, Planning Board, and Board of Appeals. The Committee’s scope is to “support and promote effects (sic) to foster economic strategies working with the local business community within the Town of Duxbury.” The current Committee was reconstituted in September 2008. It began by reassessing the Committee’s goals and objectives and narrowing its focus to the following:

- a) Explore ways to enhance existing business districts including business mix, façade improvements, signage, traffic patterns and pedestrian access and make appropriate recommendations.
- b) Identify desirable new businesses and possibilities for expansion of existing businesses. Recommend steps to encourage business development and business success in Town, including home occupations.
- c) Examine and propose improvements to Zoning Bylaw and ZBA, Planning Board and other relevant Town Board and Committee processes to facilitate reasonable commercial development.

Part 4: Application Submittal Process

Applications are due to OCPC by January 31, 2014. Applications may be sent via email, mail or fax to:

Eric Arbeene, Community Planner

## **APPENDIX 2:      HALL’S CORNER CUSTOMER SURVEY RESULTS**

**Question 1: For what purposes do you visit Hall's Corner? (340 respondents)**

- The primary purposes respondents visit Hall's Corner were shopping (90%), dining (63.2%) and services (57.1%).

Trip Purpose	Number	Percent
Shopping	306	90.0%
Dining	215	63.2%
Services	194	57.1%
Work	34	10.0%
I Never Visit Hall's Corner	6	1.80%

\*Numbers/Percentages exceed 100% due to multiple responses.

**Question 2: How often do you use the businesses and services in Hall's Corner? (344 respondents)**

- The majority (79.3%) of respondents utilize the business and services in Hall's Corner at least once per week, with more than half (58.1%) of the respondents stating that they utilize the business and services in Hall's Corner multiple times per week.

Frequency	Number	Percent
A Few Times a Week	200	58.1%
Once a Week	73	21.2%
2-3 Times Per Month	33	9.6%
Once a Month	23	6.7%
Rarely/Never	15	4.4%

**Question 3: Name the three businesses you frequent most in Hall's Corner. (330 respondents)**

- Foodies was clearly the most frequented business in Hall's Corner, with 62.7% of respondents listing it as one the three businesses they frequent the most in Hall's Corner.
- Other highly frequented businesses included Dunkin Donuts (23.6%), Rite Aid (21.5%), Duxbury Pizza (20.6%) and the Post Office (20%).

Business	Number	Percent
Foodies	207	62.7%
Dunkin Donuts	78	23.6%
Rite Aid	71	21.5%
Duxbury Pizza	68	20.6%
Post Office	66	20.0%
Gas Station	45	13.6%
Wildflower Cafe	36	10.9%
Tsang's Café	34	10.3%
Duxbury Consignment/Thrift Shop	33	10.0%
Cottons	30	9.1%
Westwinds Bookshop	30	9.1%
Duxbury Wine & Spirits	29	8.8%
Randy's Dry Cleaning	26	7.9%
D'Orazio's	24	7.3%
Gunther Tooties	24	7.3%
Hall's Corner Store	22	6.7%
Rock, Paper, Scissors	19	5.8%

Business	Number	Percent
Scoops Ice Cream	18	5.5%
Eastern Bank	17	5.2%
The Studio	16	4.8%
Lux Nails	15	4.5%
Michelle's Nails	14	4.2%
Sportworks	13	3.9%
One Gifts & Coffee	12	3.6%
Rockland Trust	12	3.6%
Depot Street Market	11	3.3%
Empire Cleaners	8	2.4%
Reed's Jewelers	8	2.4%
Consider the Lillies	7	2.1%
Santander Bank	7	2.1%
Beehive Salon	6	1.8%
Duxbury Deli	6	1.8%
The Cleanist	5	1.5%
Bank of America ATM	4	1.2%
Duxbury Cleaners	4	1.2%

\*Numbers/Percentages exceed 100% due to multiple responses.

\*\*Businesses mentioned in less than 1% of surveys were not included.

**Question 4: What advertising venues used by merchants in Hall's Corner do you notice the most? (Check all that apply.) (289 respondents)**

- An overwhelming majority (84.8%) responded that the Duxbury Clipper is the advertising venue that they noticed the most.

Advertising Venue	Number	Percent
Patriot Ledger	11	3.8%
Duxbury Clipper	245	84.8%
T.V.	1	0.3%
Radio	11	3.8%
Window Displays	97	33.6%
Direct Mail	35	12.1%

\*Numbers/Percentages exceed 100% due to multiple responses.

**Question 5: Currently, what do you think are the major advantages of shopping or doing errands in Hall's Corner? (Check top 3) (336 respondents)**

- Respondents indicated the top three major advantages of shopping or doing errands in Hall's Corner are its convenient location (90.8%), their desire to support local businesses (78%), and vendor's friendly service (44.9%).

Major Advantages	Number	Percent
Convenient Location	305	90.8%
Selection of Goods & Services	79	23.5%
Ease of Parking	93	27.7%
Less Traffic/Crowds	90	26.8%
Fair Prices	19	5.7%

Major Advantages	Number	Percent
Friendly Service	151	44.9%
Support Local Businesses	262	78.0%

\*Numbers/Percentages exceed 100% due to multiple responses.

**Question 6: Currently, what do you think are the major disadvantages of shopping or doing errands in Hall's Corner? (Check top 3) (294 respondents)**

- Respondents indicated the top three major disadvantages of shopping or doing errands in Hall's Corner were its high prices (51%), limited hours (42.9%), and poor selection of goods and services (40.5%).

Major Disadvantages	Number	Percent
Inconvenient Location	16	5.4%
Poor Selection of Goods & Services	119	40.5%
Lack of Parking	72	24.5%
Traffic	70	23.8%
High Prices	150	51.0%
Limited Hours	126	42.9%
Poor Appearance	48	16.3%

\*Numbers/Percentages exceed 100% due to multiple responses.

**Question 7: What can merchants in Hall's Corner do to improve their stores? (Check top three) (331 respondents)**

- The most common responses as to what merchants can do to improve their stores were to lower their prices/have sales (40.2%), improve their selection of goods/services (33.2%) and expand their store hours.
- Almost one-third (30.5%) of respondents indicated that there is nothing merchants need to do to improve their stores, as they are happy with the current conditions.

Desired Improvements	Number	Percent
Improve Appearance	82	24.8%
Expand Store Hours	90	27.2%
Improve Selection	110	33.2%
Advertise	32	9.7%
Lower Prices/Sales	133	40.2%
Improve Customer Service	19	5.7%
Nothing, I am happy with the merchants in Hall's Corner	101	30.5%

\*Numbers/Percentages exceed 100% due to multiple responses.

**Question 8: When do you do most of your shopping? (338 respondents)**

- A large majority of respondents (71.7%) indicated that they do most of their shopping during the week, with the most common time period being weekday afternoons (21.1%).

Time Period	Number	Percent
Weekday Mornings (7:00 AM to 11:00 AM)	67	16.7%
Weekday Mid-days (11:00 AM to 1:00 PM)	79	19.7%
Weekday Afternoons (1:00 PM to 5:00 PM)	85	21.1%

Time Period	Number	Percent
Weekday Evenings (After 5:00 PM)	57	14.2%
Saturday Morning	49	12.2%
Saturday Afternoon	41	10.2%
Sunday Morning	7	1.7%
Sunday Afternoon	17	4.2%

**Question 9: Do you tend to patronize businesses in Hall's Corner more during the summer months? (340 respondents)**

- Nearly half (44.1%) of respondents indicated that they patronize Hall's Corner more often during the summer months.

Patronage Increase in the Summer	Number	Percent
Yes	150	44.1%
No	190	55.9%

**Question 10: Where do you do most of your shopping? (340 respondents)**

- The overwhelming majority (82.7%) of respondents do most of their shopping outside of Duxbury.
- Of the respondents who indicated that they do most of their shopping outside of Duxbury, more than half (42.9%) do so in Kingston.
- Shopping via the Internet is a growing trend due, which will continue to grow in the coming years.

Most Frequently Shopped Area	Number	Percent
Hall's Corner	51	13.6%
Other Locations in Duxbury	14	3.7%
Kingston	161	42.9%
Marshfield	49	13.1%
Plymouth	55	14.7%
Internet/Mail Order	45	12.0%

\*The total number of responses is 375, due to the fact that some respondents recorded two answers, as they split their shopping between two areas.

**Question 11: If you do not do most of your shopping in Hall's Corner, why do you shop at the other locations? (Open-ended Question) (253 respondents)**

- The most common reason respondents gave for not doing most of their shopping in Hall's Corner was a lack of variety, followed its high prices. Respondents frequently indicated that they shop in nearby communities due to their greater selection of stores/services and their accompanying lower prices.

**Question 12: What types of additional businesses and services would you like to see in Hall's Corner? (Check all that apply) (295 respondents)**

- The most requested type of additional business restaurants. The most commonly requested restaurant type was a sit-down restaurant (65.2%). Other highly requested restaurant types businesses were a café/bakery (45.1%) and take-out restaurants (29.5%).

- The most highly requested non-restaurant business was a hardware/garden store, with 46.8% of respondents indicating they would like to see one in Hall's Corner.

Requested Businesses/Services Types	Number	Percent
Restaurant (Sit Down)	192	65.1%
Restaurant (Take Out)	87	29.5%
Café/Bakery	133	45.1%
Specialty Food Store	68	23.1%
Clothing/Accessory Store	99	33.6%
Card/Gift Shop	41	13.9%
Home Furnishings Store	32	10.8%
Hardware/Garden Store	138	46.8%
Jewelry Store	3	1.0%
Pharmacy	14	4.7%
Health/Personal Care Services	14	4.7%
Barber/Hairdresser	23	7.8%
Exercise Studio	34	11.5%
Art Gallery	28	9.5%
Antiques Shop	39	13.2%
Financial Services	4	1.4%

\*Numbers/Percentages exceed 100% due to multiple responses.

**Question 13: If you could change one thing about Hall's Corner, what would it be? (Open-ended Question) (255 respondents)**

- The most requested change as indicated by respondents would be to improve the current traffic conditions in Hall's Corner. This included addressing traffic flow at the rotary, having better pedestrian amenities and placing a Stop sign at Chestnut Street.
- Other highly requested changes were to increase the variety/selection of stores in Hall's Corner, most notably restaurants, as well as to improve the appearance of the area, including streetscaping improvements and updating the building façades.

**Question 14: What identity or image would you like to see Hall's Corner develop for itself as a unique business and shopping district? (Open-ended Question) (187 respondents)**

- The most commonly mentioned identity or image respondents indicated they would like to see for Hall's Corner would be a quaint, traditional New England coastal village. Frequently mentioned comparisons included Downtown Hingham and Scituate Harbor.
- A number of respondents also indicated that they like the current identity/image of Hall's Corner, but noted that it needs some aesthetic improvements, with regards to streetscaping and building appearance.

**Question 15: Please indicate your gender. (339 respondents)**

- The majority (69.3%) of respondents were female.

Gender	Number	Percent
Male	104	30.7%
Female	235	69.3%

**Question 16: Please indicate your age. (333 respondents)**

- The majority (67.5%) of respondents were between the ages of 35-64.
- Only 9.3% of the respondents were under 35.

Age	Number	Percent
15-19	5	1.5%
20-24	4	1.2%
25-34	22	6.6%
35-44	85	25.5%
45-54	83	24.9%
55-64	57	17.1%
65-74	51	15.3%
75-84	26	7.8%
85+	0	0.0%

**Question 17: Please indicate your average annual household income. (282 respondents)**

- More than 70% of respondents reported having an annual household income over \$100,000.

Household Income	Number	Percent
Less than \$10,000	3	1.1%
\$10,000 to \$14,999	4	1.4%
\$15,000 to \$24,999	5	1.8%
\$25,000 to \$34,999	3	1.1%
\$35,000 to \$49,999	20	7.1%
\$50,000 to \$74,999	20	7.1%
\$75,000 to \$99,999	29	10.3%
\$100,000 to \$149,999	63	22.3%
\$150,000 or More	135	47.9%

**Question 18: Please estimate how many miles you live or work from Hall's Corner. (339 respondents)**

- The majority (90.9%) of respondents either lived and/or worked within 5 miles of Halls' Corner.

Miles	Number	Percent
Under 1 Mile	81	23.9%
1-3 Miles	137	40.4%
3-5 Miles	90	26.6%
6-10 Miles	23	6.8%
10 or More Miles	8	2.4%

**Question 19: Please share any further comments below. (Open-ended Question) (80 respondents)**

- Further comments shared by respondents mirrored the responses given in response to Question 13 "If you could change one thing about Hall's Corner, what would it be?" and indicated a desire to address traffic flow at the rotary, having better pedestrian amenities and placing a Stop sign at Chestnut Street. Other highly requested changes were to increase the variety/selection of stores in Hall's Corner as well as to improve the overall appearance of the area.
